Fees Structure For First Year Students Moi University 2015:

New Pathways to Job Creation and Development in Africa Haroon Bhorat, Brahim Coulibaly, Richard Newfarmer, John Page, 2025-05-06 Creating productive jobs for growing a labor force is both one of the world's greatest challenges as well as one of its greatest economic opportunities and one of the most consequential global megatrends. Nowhere is the job creation challenge more acute than for young people in Africa. In response to this challenge and to also address Africa's structural economic transformation, the Africa Growth Initiative at Brookings has undertaken research on the prospects for large-scale job creation through the development of industries without smokestacks including tourism, agro-processing, horticulture, and services that has revealed a promising path forward. This book is the first to document the potential for non-traditional industries to address the formal sector job creation that is critical for Africa to simultaneously harness its demographic dividend and achieve structural transformation. In the face of premature deindustrialization, many economists have voiced pessimism about Africa's ability to replicate past economic development models. The book also documents the potential of an alternative economic development model for Africa based on industries without smokestacks. Finally, the book suggests practical policy solutions to realize the potential of these industries. [Encyclopedia of Christianity in the Global South](#) Mark A. Lamport, 2018-06-01 The rapid growth of Christianity in the global south is not just a demographic shift; it is transforming the faith itself. The Encyclopedia of Christianity in the Global South traces both the history and the contemporary themes of Christianity in more than 150 countries and regions. It includes maps, images, and a detailed timeline of key events.

Corruption Scandals and their Global Impacts Omar E. Hawthorne, Stephen Magu, 2018-05-11 Corruption scandals receive significant press coverage and scrutiny from practitioners of global governance and bilateral and multilateral donors. Across the globe, the annual publication of TI's CPI and World Bank's Worldwide Governance Indicators elicits spirited denials and accusations of targeting of neo-colonialism. Poor measures on corruption indices and the ensuing negative publicity can have serious consequences both externally through a freeze or retraction of donor funding and internally through reducing the availability of public funds and harming the credibility of serving governments and institutions. *Corruption Scandals and their Global Impacts* tracks several major corruption scandals across the world in a comparative analysis to assess the full impact of global corruption. Over the course of the book, the contributors deliberate the exposure and reporting of corruption scandals, demonstrate how corruption inhibits development on different levels and across different countries, the impact it has on the country in question, how citizens and authorities respond to corruption, and some local, regional, and global policy and legislative measures to combat corruption. The chapters examine the transnational manifestation of corruption scandals around the world from developed countries and regions such as the United States and the European Union to BRIC countries, Brazil and Russia, to developing countries such as Belarus, Jamaica, Kenya, and Nigeria. In each case, chapters highlight the scandal, its impact, the local, regional, and global responses, and the subsequent global

perceptions of the country Concluding with a review of the global impacts of corruption scandals this book provides an important comparative analysis which will be useful to students and scholars of international development and politics as well as to development practitioners donors politicians and policy makers
