SEP 11 2013

NRC HQ Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

To Whom It May Concern:

Enclosed is a copy of the Final After Action Report/Improvement Plan for the Radiological Emergency Preparedness (REP) Hostile Action Based, Partial Participation Phase Exercise Pathway Exercise conducted on June 4, 2013, for the Donald C. Cook Nuclear Plant. The State of Michigan and the risk county of Berrien participated in this exercise. The utility owner and operator, American Electric Power, Incorporated, also participated in this exercise.

No Deficiencies were identified for the State of Michigan or Berrien County during this exercise.

No Areas Requiring Corrective Action (ARCAAs) were identified for the State of Michigan or Berrien County during this exercise.

There was one Area Requiring Corrective Action (ARCA) identified during a previous exercise which was redemonstrated by the State of Michigan during this exercise. The ARCA identified for the State of Michigan, number 44-12-401-A-01, was under Criterion 4.4.1 - The laboratory is capable of performing required radiological analyses to support protective action decisions, whereas the Michigan Department of Environmental Quality (MDEQ) Radiological Protection Laboratory (RPL) facility, equipment and staff did not demonstrate the capability to process, analyze and store radiological samples and report the results of their analysis in a timely and accurate manner. This ARCA was successfully re-demonstrated on June 3, 2013.

There were no Floating Issues identified for the State of Michigan or Berrien County during this exercise.

A detailed discussion of these issues can be found in Part IV of this report.

Based on the results of the June 4, 2013 exercise, the offsite radiological emergency response plans and procedures for the State of Michigan and Berrien County, site-specific to the Donald C. Cook Nuclear Plant can be implemented, and are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at this site.
