$$\text{Equation: } y = mx + b$$

$$y = 3x - 3$$

2

$$m = \frac{-3}{2} = -\frac{3}{2} \quad b = 2$$

$$\text{Equation: } y = mx + b$$

Dying from Improvement Sherene Razack, 2015-05-27 No matter where in Canada they occur inquiries and inquests into untimely Indigenous deaths in state custody often tell the same story Repeating details of fatty livers mental illness alcoholic belligerence and a mysterious incapacity to cope with modern life the legal proceedings declare that there are no villains here only inevitable casualties of Indigenous life But what about a sixty seven year old man who dies in a hospital in police custody with a large visible purple boot print on his chest Or a barely conscious alcoholic older man dropped off by police in a dark alley on a cold Vancouver night Or Saskatoon s infamous and lethal starlight tours whose victims were left on the outskirts of town in sub zero temperatures How do we account for the repeated failure to care evident in so many cases of Indigenous deaths in custody In *Dying from Improvement* Sherene H Razack argues that amidst systematic state violence against Indigenous people inquiries and inquests serve to obscure the violence of ongoing settler colonialism under the guise of benevolent concern They tell settler society that it is caring compassionate and engaged in improving the lives of Indigenous people even as the incarceration rate of Indigenous men and women increases and the number of those who die in custody rises Razack s powerful critique of the Canadian settler state and its legal system speaks to many of today s most pressing issues of social justice the treatment of Indigenous people the unparalleled authority of the police and the justice system and their systematic inhumanity towards those whose lives they perceive as insignificant *Law, Gender Identity, and the Brain* Aileen Kennedy, 2023-12-08 This book challenges law s reliance on neurology s brain sex binary The brain has become the latest candidate in a historical search for a reliable and fixed biological marker of true sex that has permeated every aspect of Western culture including law As definitions of the sexed and gendered body have become ever more contentious the development and dissemination of brain sex theories have come to dominate popular understanding of LGBTI identities But this book argues the brain is no more helpful than earlier biological measures in ensuring just outcomes Examining how law determines and differentiates male and female in two contested areas of sexed identity through a discussion of Australian cases authorising medical interventions to alter the embodied sex characteristics of transgender minors and intersex minors the book demonstrates an incoherence in the legal understanding of gender identity development As the brain too fails as a convincing biological anchor for the binary sex categories of male and female law must it is argued retreat from its aspiration to create define and regulate artificially bounded sex categories of male and female This book will be of great interest to scholars and students in a range of disciplines who are working at the intersection of law gender and sexuality *Thinsanity* Glenn Mackintosh, 2019-12-31 We are becoming more and more obsessed with being thin as we get fatter and fatter The craziest part is that most weight loss solutions are actually part of the problem Diet and exercise programs fail 97% of people in the long term resulting in short term weight loss medium term regain and long term gain approximately 10 to 15% above starting weight Scientists have known this reality for decades the entire diet industry is

based on it yet we keep on falling for promises of fast easy permanent weight loss and other fictional tales putting ourselves through rebranded versions of the exact same thing and expecting different results Some might call this insanity weight management psychologist Glenn Mackintosh calls it Thinsanity Glenn's book Thinsanity aims to transform the way we approach weight management of the body by starting with the mind New scientific developments are offering insights into a compassionate way to make peace with food fall in love with physical movement and learn to LOVE your body healthy Glenn takes all those new scientific developments and expresses them the way he does with his clients clearly and with lots of understanding This book is right for anyone who wants to learn to love their body and be healthy in it     The SAGE Encyclopedia of Marriage, Family, and Couples Counseling Jon Carlson, Shannon B. **The Intricacy of Languages** Francesc Feliu, Olga Fullana, 2019-10-15 If as we believe the history of languages is the history of the construction of an ideal artefact that permits a specific interpretation of the linguistic reality and helps to approve and assimilate a certain zone of diversity enabling the accumulation of collective historical knowledge and making us identify it with a social community and a territory then it must be agreed that languages are extremely complex entities The new linguistic diversity that cultural globalisation and recent population movements have installed in most traditional linguistic territories has probably put the ideology of the national language into a state of crisis and as a consequence has made the ancient intrinsic diversity of all languages visible at least to the extent that this is still possible Nowadays then the old linguistic diversity of dialects of parlances of local lexicons and the cultural forms that are reflected in these of varieties and previously unsuccessful linguistic entities has been given a new opportunity in a world where the cohesion of societies and the welfare of citizens must be guaranteed using all available means Looked at this way the intricacy of languages may even open up an opportunity for local economic and social development
