

2. GASEOUS EXCHANGE

- This is the process by which respiratory gases (carbon (IV) oxide and oxygen) are passed across the respiratory surface.
- This is brought about by the concentration gradient between the body of living organisms and the surrounding medium.
- In simple organisms gaseous exchange takes place through simple diffusion **because they have larger surface area to volume ratio** while complex organisms have special organs for gaseous exchange.

Importance/significance of gaseous exchange.

- i. It enables cells to obtain oxygen for respirations and facilitate removal of carbon (IV) oxide as a metabolic waste.
- ii. It enables the green plants to obtain carbon (IV) oxide necessary for photosynthesis.

Medicine, second edition Declan O'Kane,2017-10-16 Acute Medicine 2e is a current and concise guide to hospital emergency medicine for registrars junior doctors and medical students working on the wards This second edition has been comprehensively revised and updated to incorporate the latest treatment guidelines It has been substantially rewritten and streamlined to enable the reader to access the pertinent information even more quickly It is not just a list of instructions but contains pathophysiology and useful clinical pearls detailed management of acute medical and surgical emergencies including in pregnancy general ward management issues descriptions of key procedures normal laboratory values emergency drug formulary From reviews of the first edition This new book by Dr O Kane is a very useful and interesting book directed towards Medical registrars but also with many positive features for anyone from Medical Student to Consultants It works

through groups of emergencies according to speciality and organ grouping This is helpful as it enables the reader to link the different differentials together well It also tries to signpost all the different conditions in relation to the Acute Medicine and General Internal Medicine curriculums There is also an excellent section on fluid prescription outlining what each fluid option contains along with potential fluid prescriptions in relation to the daily needs of the human body Each clinical problem is presented in a clear and logical format beginning with the things to ask or think about when receiving a referral much as junior doctors would do in a real clinical situation The book also includes an excellent general management section which covers important aspects of the assessment of mental capacity and considerations to make when discharging a patient things which are often poorly taught in other settings All of the clinical procedures are described in some level of detail not enough to learn to do the procedure but enough to signpost as well as getting the reader to think about why it is needed and any associated risks *Journal for Acute Medicine* October 2015 *Classification Bulletin of the United States Patent Office from ...
