*Landmark Papers in Neurosurgery* Reuben D. Johnson, Alexander L. Green, 2014 Evidence based medicine is a concept that has come to the fore in the past few years Clinicians are increasingly encouraged to practise patient management based on available evidence in the scientific literature For example new pharmacological therapies are only used when large randomized trials have proven that a particular drug is better than existing ones This is also the case in surgical specialties although surgery has traditionally seen a lack of use of this information with individual surgeon s preferences being most influential in treatment choices However more recently there has been a large expansion of trials and studies aimed at providing surgeons with information to guide their choices using firm evidence This new edition has been revised and expanded to include new data where relevant and also features a new chapter on pituitary surgery *Landmark Papers in Neurosurgery 2e* remains a key collection of the most important trials and studies in neurosurgery allowing the reader to rapidly extract key results and making it essential reading for all neurosurgeons and trainees in the field **Green Pulp**

*High-solid and Multi-phase Bioprocess Engineering* Hongzhang Chen, 2018-05-21 This book provides a comprehensive description of theories and applications of high solid and multi phase bioprocess engineering which is considered as an

important way to address the challenges of high energy consumption high pollution and high emissions in bio industry It starts from specifying the solid phase matrix properties that contribute to a series of solid effects on bioprocess including mass transfer restrictions in porous media water binding effects rheological changes Then it proposes the new principles of periodic intensification which combines the normal force and physiologic characteristics of microorganism for the bioprocess optimization and scale up Further breakthroughs in key periodic intensification techniques such as periodic peristalsis and gas pressure pulsation are described in detail which provide an industrialization platform and lay the foundation for high solid and multi phase bioprocess engineering This book offers an excellent reference and guide for scientists and engineers engaged in the research on both the theoretical and practical aspects of high solid and multi phase bioprocess
