### **How to Think about Religious Schools**

Matthew Clayton,Andrew Mason,Adam Swift,2024-07-31 Should religious schools be an option Should they receive public funding Are they bad for community cohesion What should we make of the charge that they indoctrinate How should they be regulated People disagree on the answers to these questions Some maintain that religious schools should not be permitted If parents want to raise their children in a particular faith at home then that is up to them but schools should not be involved Others think it obvious that parents should be free to send their children to religious schools Any government that ruled that out would be violating parents right to religious freedom or their right to raise their children according to their own beliefs In order to make progress on these issues we need a way of thinking about them that enables us to understand more clearly what is at stake This book provides a framework that identifies the different kinds of normative considerations that are in play and provides the basis for understanding why people disagree about religious schools It uses a method that involves moving from the relevant normative considerations especially the child s potential to acquire personal autonomy and to develop a capacity

and disposition to treat others as equals to specific policy proposals for governing religious schools in England today taking into account the legal and political constraints on policy options and the likely unintended consequences of reforms A unique feature of the book is that its three authors have somewhat different perspectives on the implications of the normative framework they each endorse which they draw out in separate chapters Despite reaching different conclusions on some philosophical issues concerning religious schools the framework and method they share enables them to converge on a regulatory framework that forbids directive teaching aimed at imparting religious beliefs in publicly funded religious schools and that makes the charitable status of private religious schools conditional on avoiding this kind of teaching **Handbook**
