Young People on the Margins Loic Menzies, Sam Baars, 2021-03-30. Our society leaves too many young people behind. More often than not, these are the most vulnerable young people, and it is through no fault of their own. Building a fair society and an equitable education system rests on bringing in and supporting them. By drawing together more than a decade of studies by the UK's Centre for Education and Youth, this book provides a new way of understanding the many ways young people in England are pushed to the margins of the education system and, in turn, society. Each contributor shares the personal stories of the young people they have encountered over the course of their fieldwork and practice, combining this with accessible syntheses of previous studies alongside extensive analysis of national datasets and key publications. By unpicking the many overlapping factors that contribute to different groups' vulnerability, the book demonstrates the need to understand each young person's life story and to respond quickly and collaboratively to the challenges they face. The chapters conclude with action points highlighting the steps individuals, institutions, and policy makers can take to bring young people in from the margins. **Young People on the Margins** showcases first-hand examples of where these young people's needs are being addressed and trends, bucking drawing out what can and must be learned for teachers, leaders, youth workers, and policy makers.

The Challenges of the Digital Transformation in Education Michael E. Auer, Thrasyvoulos Tsiatsos, 2019-03-15. This book offers the latest research and new perspectives on Interactive Collaborative Learning and Engineering Pedagogy. We are currently witnessing a significant transformation in education, and in order to face today's real-world challenges, higher education has to find innovative ways to quickly respond to these new needs. Addressing these aspects was the chief aim of the 21st International Conference on Interactive Collaborative Learning ICL2018, which was held on Kos Island, Greece, from September 25 to 28, 2018. Since being founded in 1998, the conference has been devoted to new approaches in learning, with a special focus on collaborative learning. Today, the ICL conferences offer a forum for exchanging information on relevant trends and research results, as well as sharing practical experiences in learning and engineering pedagogy. This book includes papers in the fields of Collaborative Learning, Computer Aided Language Learning, CALL, Educational Virtual Environments, Engineering Pedagogy, Education, Game-based Learning, K-12 and Pre-College Programs, Mobile Learning Environments, Applications. It will benefit a broad readership, including policymakers, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.
