Perspectives on Youth, HIV/AIDS and Indigenous Knowledges Anders Breidlid, Austin M. Cheyeka, Alawia Ibrahim Farag, 2015-10-13 This volume is the result of academic cooperation between scholars in Norway Sudan Zambia and South Africa linked to a master's program in international education and development It draws upon studies carried out in Sudan Zambia Namibia and South Africa Most of the chapters deal with the HIV AIDS pandemic in various ways Because youth are the group most vulnerable to HIV AIDS the various chapters discuss the complex discursive spaces that youth inhabit and navigate and where the interlocking concepts of social identity power inequality sexuality vulnerability and resilience are brought together Many of the chapters discuss the HIV AIDS pandemic in relation to indigenous knowledges and argue for including indigenous knowledges in the fight against the pandemic The suggestion to include indigenous knowledges opens space for a more varied holistic and comprehensive approach to the pandemic The book invites readers to explore the oppressive and often dangerous socioeconomic situation that many youth in sub Saharan Africa experience also beyond the

HIV AIDS pandemic Chapters on street youth in Namibia and youth in a township in Cape Town discuss the often creative coping mechanisms employed by youth to escape or mitigate the oppressive situations they find themselves in **(Free Sample) UPPSC BEO (Block Education Officer) Preliminary Examination Guide** Disha Experts,2020-01-24 **UPPSC BEO (Block Education Officer) Preliminary Examination Guide** Disha Experts,2020-01-04 **The Global Testing Culture** William C. Smith,2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences **Passing Assessments for the Certificate in Education and Training** Ann Gravells,Susan Simpson,2014-04-22 This is an essential text for anyone taking the Certificate in Education and Training no matter which awarding organisation you are registered with or who your learners are It s readable relevant easy to understand and gives key advice on approaching and completing written and practical assessments It helps all learners to understand the requirements of the qualification and to evidence their achievement towards the mandatory units The book gives advice regarding study skills academic writing and referencing reflective practice teaching practice and observations and the minimum core The book will Help learners with the written assessments towards the five mandatory units of the Certificate Give guidance on how learners can demonstrate and

Extended Curriculum Programmes Tennyson Mgutshini,2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa s key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector
