European Corporate Law Adriaan F.M. Dorresteyn, Christoph Teichmann, Erik Werlauff, Tiago Monteiro, Nadia Pocher, 2016-04-24. This fully updated new edition provides the best known practical overview of the law regarding companies' business activities and capital markets in Europe at both the European Union (EU) and Member State levels. It incorporates analysis of recent developments including the impact of global initiatives in such aspects of the corporate environment as regulation of financial institutions and non-financial reporting obligations with a view to sustainability and other social responsibility concerns. The authors, all leading experts in European corporate law, describe current and emerging trends in such areas of corporate law practice as the following: rules on cross-border mergers; employee involvement in business activities; the initiatives by the Organisation for Economic Co-operation and Development (OECD) and the EU to curb tax avoidance; Member States' implementation of EU legislation; a company's freedom to incorporate in a jurisdiction not its own; competition among the legal forms of different Member States; and safeguarding of employee involvement in cross-border transactions. With respect to national law, the laws of Belgium, France, Germany, the Netherlands, Poland, Spain, and the United Kingdom are taken into account. Italy is now included in this new edition. As in earlier editions, the authors demonstrate that analysis and comparison of national corporate laws yield highly valuable general principles and observations, not least because business organizations, wherever located, tend to show a fundamentally similar set of legal characteristics. The Third Edition will continue to be of great value to practitioners and academics who wish to acquire a better understanding of European corporate law in its supranational dimension as well as in the similarities and differences among the various national legal systems.

The Limits of Institutional Reform in Development Matt Andrews, 2013-02-11. Developing countries commonly adopt reforms to improve their governments, yet they usually fail to produce more functional and effective governments. Andrews argues that reforms often fail to make governments better because they are introduced as signals to gain short-term support. These signals introduce unrealistic best practices that do not fit developing country contexts and are not considered relevant by implementing agents. The result is a set of new forms that do not function. However, there are realistic solutions emerging from institutional reforms in some developing countries. Lessons from these experiences suggest that reform limits, although challenging to adopt, can be overcome by focusing change on problem solving through an incremental process that involves multiple agents.
