Mobile Learning Applications in Early Childhood Education Papadakis, Stamatios, Kalogiannakis, Michail, 2019-11-29

Mobile technologies combined with an interdisciplinary approach to knowledge and organization of learning experiences that are meaningful to children could create a creative and interactive learning environment different from that of traditional teaching. Making good use of mobile learning with appropriate devices will increase the learning motivations of the students and help them bring about positive performance. *Mobile Learning Applications in Early Childhood Education* is a collection of innovative research on the methods and applications of mobile learning techniques and strategies within diversified teaching settings. While highlighting topics including computational thinking, ubiquitous learning, and social development, this book is ideally designed for researchers, teachers, parents, curriculum developers, instructional designers, academicians, students, and practitioners seeking current research on the application of mobile technology within child education. **Research**

Anthology on Pediatric and Adolescent Medicine Management Association, Information Resources, 2022-02-25. The study of pediatric and adolescent medicine is an essential part of medicine as children react to diseases differently than adults. As new viruses continue to emerge and as procedures are updated and revised, there is a need for comprehensive resources on the new developments and emerging technologies in this field. As medical technologies and innovative practices spread in recent years, it is vital that medical professionals are knowledgeable on the developments in the pediatric field as well. The *Research Anthology on Pediatric and Adolescent Medicine* presents the developments, emerging technologies, and challenges in pediatric and adolescent medicine. It also explains adolescent health management and promotion, as well as recent discoveries on childhood development. Covering topics such as media consumption, neurodevelopmental disorders, and health promotion, this book is a critical resource for pediatricians, nurses, medical professionals, hospital administration, behavioral scientists, therapists, psychiatrists, medical students, researchers, and academicians. **Emerging Trends in Smart**

Handbook of Research on Innovative Approaches to Early Childhood Development and School Readiness Betts, Anastasia Lynn, Thai, Khanh-Phuong, 2022-02-11 School readiness is as much about schools recognizing the existing capabilities and knowledge each child has when they enter school as it is about supporting children and families in their preparation for entering formal learning environments Effective approaches that address learning

variability must take these differences into account recognizing and leveraging opportunities inherent in the child's ecosystem of resources. The Handbook of Research on Innovative Approaches to Early Childhood Development and School Readiness assembles the most current research and thought leadership on the ways in which innovative education stakeholders are working together to impact the most critical years in a child's life: the years leading up to and including kindergarten. Covering topics such as change agency, experience quality, and social-emotional development, this book is a crucial resource for educational researchers, child development professionals, school administrators, pre-K teachers, pre-service teachers, program managers, policymakers, non-profit service organizations, early childhood EdTech developers, curriculum developers, and academicians.

Proceedings of the 15th International Conference on Ubiquitous Computing & Ambient Intelligence (UCAmI 2023) José Bravo, Gabriel Urzáiz, 2023-11-24. This book serves as a comprehensive compilation of groundbreaking research endeavors within the realms of ambient intelligence and ubiquitous computing. These initiatives are pivotal in enabling both researchers and practitioners to discern recent breakthroughs and emerging frontiers in these fields. Encompassing a wide array of domains including Ambient Active and Assisted Living (A3L), the Internet of Things (IoT), Smart Environments, Data Science, and Human Ambient Interaction, it acts as a valuable resource for scholars, professionals, and graduate students alike. The primary aim of this book is to empower individuals within the academic and professional community to harness this wealth of knowledge. It equips them to tackle innovative challenges and engineer smart and ubiquitous solutions that will shape the landscape of the next decade. By amalgamating insights from various facets of ambient intelligence and ubiquitous computing, this book encourages cross-disciplinary collaboration and fosters a holistic understanding of the field. Thus, it not only highlights the recent strides in these areas but also serves as a roadmap for future exploration and innovation, paving the way for a smarter and more interconnected world.

Wearable Interaction Vivian Genaro Motti, 2020-01-01. This book offers the reader a comprehensive view of the design space of wearable computers, cutting across multiple application domains and interaction modalities. Besides providing several examples of wearable technologies, Wearable Interaction illustrates how to create and to assess interactive wearables, considering human factors in design decisions related to input entry and output responses. The book also discusses the impacts of form factors and contexts of use in the design of wearable interaction. Miniaturized components, flexible materials, and sewable electronics toolkits exemplify advances in technology that facilitated the design and development of wearable technologies. Despite such advances, creating wearable interfaces that are efficient is still challenging. The new affordances of on-body interfaces require the consideration of new interaction paradigms so that the design decisions for the user interaction take into account key limitations in the interaction surfaces of wearables concerning input entry, processing, power for output responses, and in the time and attention that wearers dedicate to complete their interaction. Under such constraints, creating interfaces with high usability levels is complex. Also, because wearables are worn continuously and in

close contact with the human body on body interfaces must be carefully designed to neither disturb nor overwhelm wearers. The context of use and the potential of wearable technologies must be both well understood to provide users with relevant information and services using appropriate approaches and without overloading them with notifications. Wearable Interaction explains thoroughly how interactive wearables have been created taking into account the needs of end users as well as the vast potential that wearable technologies offer. Readers from academia, industry or government will learn how wearables can be designed and developed to facilitate human activities and tasks across different sectors.

HCI International 2015 - Posters' Extended Abstracts Constantine Stephanidis, 2015-07-20. This is the first volume of the two volume set CCIS 528 and CCIS 529 that contains extended abstracts of the posters presented during the 17th International Conference on Human Computer Interaction HCII 2015 held in Heraklion, Crete, Greece in August 2015. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences was carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers included in this volume are organized in the following topical sections: design and evaluation methods, techniques and tools, cognitive and psychological issues in HCI, virtual, augmented and mixed reality, cross cultural design, design for aging children in HCI, product design, gesture, gaze and motion detection, modelling and recognition, reasoning, optimisation and machine learning for HCI, information processing and extraction for HCI, image and video processing for HCI, brain and physiological parameters monitoring, dialogue systems.
