Johnson, Janet B. Walton, Erin E. Peters-Burton, 2023-08-15 What if you could challenge your fifth grade students to investigate the role of composting in solid waste management With this volume in the STEM Road Map Curriculum Series you can Composting outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated STEM disciplines Like the other volumes in the series this book is designed to meet the growing need to infuse real world learning into K 12 classrooms This interdisciplinary four lesson module uses project and problem based learning to help students use the engineering design process EDP to design and create prototypes of compost systems and build a full scale composting system for school use Students will synthesize their learning about biotic and abiotic factors decomposition and engineering design as they learn about various types of compost systems create their own portable compost bins and create materials for a composting publicity campaign at their school To support this goal students will do the following Identify and explain interdependent relationships in ecosystems Compare and contrast several ecosystems Describe how compost systems are designed and constructed and apply this understanding to creating prototypes of various compost systems Understand the concept of scale and apply this understanding to create scaled models of compost systems Apply their understanding of composting compost systems and the EDP to create a full scale compost system for the school Measure various characteristics of compost The STEM Road Map Curriculum Series is anchored in the Next Generation

Science Standards the Common Core State Standards and the Framework for 21st Century Learning In depth and flexible Composting can be used as a whole unit or in part to meet the needs of districts schools and teachers who are charting a course toward an integrated STEM approach Perfect Pairs, 3-5 Melissa Stewart,Nancy Chesley,2023-10-10 Hands on lessons can be fun and compelling but when it comes to life science they aren t always possible practical effective or safe Children can t follow wolves as they hunt elk visit a prehistoric swamp or shrink down to the size of a molecule and observe photosynthesis firsthand But they can explore a whole world of animals plants and ecosystems through the pages of beautifully illustrated science themed picture books Perfect Pairs which marries fiction and nonfiction picture books focused on life science helps educators think about and teach life science in a whole new way Each of the twenty lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry based investigative process to explore that idea from life cycles and animal environment interactions to the inheritance of traits and the critical role of energy in our world Each lesson starts with a Wonder Statement and comprises three stages Engaging Students features a hands on activity that captures student interest uncovers current thinking and generates vocabulary The heart of the investigative process Exploring with Students spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables Encouraging Students to Draw Conclusions shows students how to review and analyze the information they have collected Bringing high quality science themed picture books into the classroom engages a broad range of students addresses the Performance Expectations outlined in the Next Generation Science Standards and supports the goals of the Common Core State Standards for English Language Arts Even if you are science shy Perfect Pairs can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world *Complex Networks IX* Sean Cornelius,Kate Coronges,Bruno Gonçalves,Roberta Sinatra,Alessandro Vespignani,2018-02-15 This book aims to bring together researchers and practitioners working across domains and research disciplines to measure model and visualize complex networks It collects the works presented at the 9th International Conference on Complex Networks CompleNet in Boston MA March 2018 With roots in physical information and social science the study of complex networks provides a formal set of mathematical methods computational tools and theories to describe prescribe and predict dynamics and behaviors of complex systems Despite their diversity whether the systems are made up of physical technological informational or social networks they share many common organizing principles and thus can be studied with similar approaches This book provides a view of the state of the art in this dynamic field and covers topics such as group decision making brain and cellular connectivity network controllability and resiliency online activism recommendation systems and cyber security **Integrating Social and Emotional Learning with Content** Katherine Kapustka,Sarah Bright,2022-03-14 Integrating Social and Emotional Learning with Content builds a framework for creatively and effectively using picture books to integrate social and emotional learning SEL with teaching across content areas

Thoughtful book choices in mixed ability early elementary classrooms have the power to not only support gifted students as they develop academically but also to provide an opportunity to address their unique social and emotional needs such as asynchronous development and an early awareness of complex and challenging issues in their lives and the world at large. Picture books are an invaluable tool for this work because the characters, topics, and settings increasingly represent and celebrate the lived experiences of diverse student populations supporting culturally responsive teaching. Packed with lesson plans, book lists, and more, this book is perfect for teachers in gifted and mixed ability classrooms as well as homeschooling parents looking to help their children make meaningful connections between their culture, languages, and lived experiences and the academic content and SEL skills they are being taught in the classroom. Changing the Grade Jonathan Cornue, 2018-01-18. Many educators agree that the 100 point grading model is not always a reliable way to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices? In Changing the Grade, author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards based grading system including 30 steps to guide you through the process. In addition to identifying and addressing the barriers to change such as concerns about how colleges and employers will interpret an alternative grading model, Cornue offers a concrete structure for changing the grading system providing guidance on: Thinking in a new way about why grades are given and the purpose of a report card; grade identifying what needs to be changed and what actions must be taken to facilitate the change; Building a team of stakeholders including teachers, principals, and guidance counselors to lead the change process; Developing the new standards based grading structure; Designing standards based assignments and assessments that align with a new grading structure; Avoiding grade inflation; and Getting buy in from teachers and other staff members, principals, administrators, the board of education, and the community by demonstrating that the change process is intentional, research based, student focused, and permanent. The book also includes helpful samples of standards based gradebooks, homework assignments, rubrics, and report cards. If you are interested in making a systemic and systematic shift to a high quality grading structure that is far less subjective than many commonly found in schools, consider Changing the Grade. **The Professional Internship of the UMUC Teacher Candidate** Kristin Kubik, Warna Gillies, 2012-08-03. The culmination of the UMUC Master of Arts program results in the teacher candidate's professional internship. All UMUC teacher candidates must complete an internship of 80 in-school days achieved over the course of one semester and under the supervision of a mentor teacher who is certified in the intern's content area. This handbook provides critical information to help the intern succeed. **Theoretical and Practical Teaching Strategies for K-12 Science Education in the Digital Age** Trumble, Jason, Asim, Sumreen, Ellis, Joshua, Slykhuis, David, 2023-01-17.
