Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters *The Three Ages of Government* Jos C.N. Raadschelders, 2020-11-05 It is only in the last 250 years that ordinary people in some parts of the world have become citizens rather than subjects This change happened in a very short period between 1780 and 1820 a result of the foundations of democracy laid in the age of revolutions A century later local governments embraced this shift due to rapid industrialization urbanization and population growth During the twentieth century all democratic governments began to perform a range of tasks functions and services that had no historical precedent In the thirty years following the Second World War Western democracies created welfare states that for the first

time in history significantly reduced the gap between the wealthy and everyone else Many of the reforms of that postwar period have been since rolled back because of the belief that government should be more like a business Jos C N Raadschelders provides the information that all citizens should have about their connections to government why there is a government what it does how it does it and why we can no longer do without it *The Three Ages of Government* rises above stereotypical thinking to show the centrality of government in human life
