Columbia Crew Survival Investigation Report, NASA/SP-2008-565, 2009 Columbia Crew Survival Investigation Report
United States. National Aeronautics and Space Administration, 2008 NASA commissioned the Columbia Accident
Investigation Board CAIB to conduct a thorough review of both the technical and the organizational causes of the loss of the
Space Shuttle Columbia and her crew on February 1 2003 The accident investigation that followed determined that a large
piece of insulating foam from Columbia's external tank ET had come off during ascent and struck the leading edge of the left
wing causing critical damage The damage was undetected during the mission The CAIB's findings and recommendations
were published in 2003 and are available on the web at <http://caib.nasa.gov> NASA responded to the CAIB findings and
recommendations with the Space Shuttle Return to Flight Implementation Plan 1 Significant enhancements were made to
NASA's organizational structure technical rigor and understanding of the flight environment The ET was redesigned to
reduce foam shedding and eliminate critical debris In 2005 NASA succeeded in returning the space shuttle to flight In 2010
the space shuttle will complete its mission of assembling the International Space Station and will be retired to make way for
the next generation of human space flight vehicles the Constellation Program The Space Shuttle Program recognized the
importance of capturing the lessons learned from the loss of Columbia and her crew to benefit future human exploration
particularly future vehicle design The program commissioned the Spacecraft Crew Survival Integrated Investigation Team
SCSIIT The SCSIIT was asked to perform a comprehensive analysis of the accident focusing on factors and events affecting
crew survival and to develop recommendations for improving crew survival for all future human space flight vehicles To do
this the SCSIIT investigated all elements of crew survival including the design features equipment training and procedures
intended to protect the crew This report documents the SCSIIT findings conclusions and recommendations PDF Executive
summary Lady Astronauts, Lady Engineers, and Naked Ladies Karin Hilck, 2019-07-08 The book Lady Astronauts Lady
Engineers and Naked Ladies is a gender history of the American space community and by extension a social history of
American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar
narrative about gender relations and cultural structures in the United States the book analyzes several different groups of
women interacting in different social spaces within the space community It therewith grants insight into the several layers of
female participation and agency in the community and the gender and race based obstacles and hurdles the female
prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at
NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces
where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the

differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century
