The Political Economy of Special Economic Zones Lotta Moberg, 2017-03-16 Special Economic Zones SEZs have become a popular development policy throughout the world over the last half a century These zones form designated areas where governments offer businesses lower taxes tariffs and often lighter regulations Generally SEZs aim to attract investments and raise a country's export and employment rates but although success stories are often cited there are numerous failed projects that have instead become burdens for their host countries This book examines SEZs from a political economy perspective both to dissect the incentives of governments zone developers and exporters and to uncover both the hidden costs and untapped potential of zone policies Costs include misallocated resources the encouragement of rent seeking and distraction of policy makers from more effective reforms

However the zones also have several unappreciated benefits They can change the politics of a country by generating a transition from a system of rent seeking to one of liberalized open markets In revealing the hidden promise of SEZs this book shows how the SEZ model of development can succeed in the future Applying frameworks from various schools of political economy this volume places SEZs in the context of their mixed past and promising future It is essential reading for anyone with an interest in international economics development economics and political economy including practitioners and consultants of SEZ policies

Economic Change and Wellbeing Fabio D'Orlando, Francesco Ferrante, Albertina Oliverio, 2021-09-01 Technological progress and globalization have generated indisputable benefits but also relevant costs such as growing economic inequality

economic fluctuations and financial instability Mainstream economics has usually considered these costs as temporary evenly distributed and more than compensated by the gains of the phases of economic expansion In this book which focuses mainly though not only on the labor market the authors contend that the major costs of the intensified process of creative destruction through which economic change proceeded have been ignored and the benefits overrated thus incorrectly estimating the net impact of economic growth on subjective wellbeing The book argues that the positive consequences of economic change and globalization may not compensate for the negatives because psychological losses are felt more strongly than gains due to loss aversion and the costs are unequally distributed those on low incomes disproportionately suffer more The result is an overall reduction in wellbeing and therefore appropriate policies are necessary to allow more people to enjoy the benefits of technological progress without suffering the costs The authors develop a comprehensive framework in which the socio psychological context and educational level of a community determine the most suitable policies both for the short and for the long run The book makes an invaluable contribution to the literature on economic growth and development labor economics the economics of wellbeing and applications of behavioral economics The readers that may be interested in this book are economists and other social scientists but also general readers since the analysis is maintained simple and accessible University teachers can use the book for courses on economic growth and development on labor economics on the economics of human capital on the economics of wellbeing and on applications of behavioral economics Trends and Applications in Knowledge Discovery and Data Mining Huiping Cao, Jinyan Li, Ruili Wang, 2016-07-15 This book constitutes the thoroughly refereed post workshop proceedings at PAKDD Workshops 2016 held in conjunction with PAKDD the 20th Pacific Asia Conference on Knowledge Discovery and Data Mining in Auckland New Zealand in April 2016 The 23 revised papers presented were carefully reviewed and selected from 38 submissions The workshops affiliated with PAKDD 2016 include Biologically Inspired Data Mining Techniques BDM Machine Learning for Sensory Data Analysis MLSDA Predictive Analytics for Critical Care PACC as well as Data Mining in Business and Finance WDMBF **The Future of Productivity** OECD, 2015-12-11 This book addresses the rising productivity gap between the global frontier and other firms and identifies a number of structural impediments constraining business start ups knowledge diffusion and resource allocation such as barriers to up scaling and relatively high rates of skill mismatch
