Moore, Angela Benson, 2012-03-16 This book written by authors representing 12 countries and five continents is a collection of international perspectives on distance learning and distance learning implementations in higher education The perspectives are presented in the form of practical case studies of distance learning implementations research studies on teaching and learning in distance learning environments and conceptual and theoretical frameworks for designing and developing distance learning tools courses and programs The book will appeal to distance learning practitioners researchers and higher education administrators To address the different needs and interests of audience members the book is organized into five sections Distance Education Management Distance Education and Teacher Development Distance Learning Pedagogy Distance Learning Students and Distance Learning Educational Tools

Uganda Jörg Wiegratz, Giuliano Martiniello, Elisa Greco, 2018-11-15 For the last three decades Uganda has been one of the fastest growing economies in Africa Globally praised as an African success story and heavily backed by international financial institutions development agencies and bilateral donors the country has become an exemplar of economic and political reform for those who espouse a neoliberal model of development The neoliberal policies and the resulting restructuring of the country have been accompanied by narratives of progress prosperity and modernisation and justified in the name of development But this self celebratory narrative which is critiqued by many in Uganda masks the disruptive social impact of these reforms and silences the complex and persistent crises resulting from neoliberal transformation Bringing together a range of leading scholars on the country this collection represents a timely contribution to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic

cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South

Transforming Research Excellence McLean, Robert ,Tijssen, Robert,Wallace, Matthew L.,Kraemer-Mbula, Erika,2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North

Clinical Epidemiology of Chronic Liver Diseases Robert J. Wong,Robert G. Gish,2018-10-24 This book emphasizes the clinical epidemiology of chronic liver diseases with a specific focus on the methodology of the discussed studies The whole spectrum of liver diseases is covered from chronic hepatitis B and C to hepatocellular carcinoma alcoholic and non alcoholic fatty liver diseases and autoimmune and cholestatic liver diseases Readers will find the most up to date information on clinical epidemiology of hepatology and will also be able to learn about important methodology and biostatistics information Each chapter contains a summary table at the end of each chapter that highlights the most relevant landmark studies their main outcomes and the unique features of the methodology The book will appeal to both practicing clinicians as well as clinical research investigators In addition this would likely be of interest to medical school or public health school students to learn about hepatology epidemiology but also some specific fundamentals of clinical research and clinical epidemiology

Sharing Higher Education's Promise beyond the Few in Sub-Saharan Africa Peter Darvas, Shang Gao, Yijun Shen, Bilal Bawany, 2017-11-15 Despite a spectacular expansion of the higher education sector in Sub Saharan Africa the supply of tertiary education has generally failed to keep pace with demand and the region continues to lag all other regions in terms of access to tertiary education This is in part a consequence of deeply entrenched patterns of inequitable access to higher education and the perpetuation of what researchers refer to as elite systems To date access to tertiary education in Sub Saharan Africa has unduly benefitted students drawn from the region s wealthiest households and overall enrollment remains disproportionately male and metropolitan These factors stifle the catalytic potential of higher education corroding its potential for driving economic growth and sustaining poverty reduction Instead patterns of access to tertiary education have generally reinforced and reproduced social inequality instead of eroding its pernicious social and economic effects This report aims to inform an improved understanding of equity in tertiary enrollment in Sub Saharan African countries and to examine the extent to which inequity functions as a bottleneck inhibiting the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness In our survey of the evidence we also aim to identify which policies most effectively address the challenge of promoting equity of access in SSA tertiary education

systems In order to achieve these objectives the report collects generates and analyzes empirical evidence on patterns of equity examines the underlying causes of inequity and evaluates government policies for addressing inequity Ideas for 21st Century Education Ade Gafar Abdullah,Ida Hamidah,Siti Aisyah,Ari Arifin Danuwijaya,Galuh Yuliani,Heli S.H.
