Malignant Effusions Pleuritis Ascites Pericardites:

Malignant Effusions Mikhail V. Kiselevsky, 2012-09-15 Malignant effusions pleuritis ascites and pericarditis are some of the most frequent manifestations of dissemination process of malignant tumors Accumulation of the malignant fluid in serous cavities results in impairment of respiratory and cardiac functions however long term evacuation of the fluid leads to severe disorders of homeostasis that may directly cause the patient's death The aim of this comprehensive book is to provide detailed information of pathogenesis and management of malignant effusions The current book focuses on three of these categories pleuritis ascites and pericarditis This book written by recognized experts in the field provides a detailed overview of current knowledge on this subject The presented book reports valuable information about malignant effusions to basic and clinical medical specialists in academia practice as well as industry The main topics considered include contemporary diagnostic approaches and modern therapeutic strategies including conventional drugs methods of intracavitary adoptive immunotherapy chemotherapy and hyperthermia commercial and experimental drugs being still under study The material is presented in an easy to read and understandable language and uses a plethora of tables and figures This book is aimed at oncologists as well as phthisiatrician surgeons therapists and physicians of various specializations who have to make diagnosis and treat effusions during their professional activity and it will be undoubtedly helpful for interns post graduates and Ph D fellows of medical centers *DeVita, Hellman, and Rosenberg's Cancer* Vincent T. DeVita, Theodore S.

Lawrence, Steven A. Rosenberg, 2008 Presenting comprehensive cutting edge information on the science of oncology and the multimodality treatment of every cancer type this eighth edition now in full color contains more than 40 brand new chapters and more than 70 chapters have been rewritten by new contributing authors **Oncologic Therapies** Everett E.

Vokes, Harvey M. Golomb, 2011-06-28 Our goal for this second edition of *Oncologic Therapies* is to again provide a brief introduction to the principles and practice of oncology and to oncologic therapies The book provides a description of the major treatment modalities including surgery radiation therapy and systemic therapies including classic chemotherapy and biological therapies as well as a brief overview of supportive care and quality of life assessments This is followed by a discussion of site specific cancers covering the hematologic malignancies and solid tumors Each chapter is designed to provide a brief discussion of background information including epidemiology risk factors and staging principles followed by a description of standard therapies according to stage as well as current investigational approaches While the major pathological and clinical features of each disease are discussed the emphasis of this book is clearly on the state of the art of standard and investigational therapies for each tumor type As such this book should be useful to general internists with an interest in oncology as well as housestaff and junior oncologists of all major oncologic modalities seeking a brief and focused patient management resource References providing more depth discussion for each field are also provided We recommend that any information pertaining to specific chemotherapy regimens and dosing be confirmed in a primary reference since we

cannot exclude the possibility of an occasional typographical error Cytology of Transudates and Exudates E. von Haam,1977-05-11 **Advanced Therapy of Breast Disease** S. Eva Singletary,Geoffrey L. Robb,Gabriel N.

Hortobagyi,2004 The information surveyed in this volume is designed to provide the clinician with an expert overview of the current state of the art in breast cancer management It should provide at least a flavor of the major paradigm shift that is occurring in this rapidly evolving field Breast cancer management is moving away from a kill or cure model and advancing toward a model focused on strategies of prevention and of long term management of breast cancer as a chronic disease The acceptance of this new paradigm by patients and clinicians alike will represent a major focus for the twenty first century

Cumulated Index Medicus ,1964 **Concise Manual of Hematology and Oncology** Michael Andreeff,Dietmar P. Berger,Benjamin Koziner,Monika Engelhardt,Hans A. Messner,Hartmut Henß,Roland Mertelsmann,N. Thatcher,2008-05-16 A real boon for medical practitioners from a number of disciplines this is a practice oriented manual of medical oncology and hematology for day to day use in caring for patients hematologic and neoplastic diseases It is founded on the longstanding experience of a large specialized university department accustomed to having to provide reliable advice in a broad range of circumstances The authors have chosen not to give a comprehensive review of the various subjects but have instead focused on practical methods which have proven to be useful in their experience with special emphasis on standardizing chemotherapy protocols **The Cytology of Effusions** A. I. Spriggs,M. M. Boddington,2016-02-26 The Cytology of

Effusions Pleural Pericardial and Peritoneal and of Cerebrospinal Fluid Second Edition provides information pertinent to the cytology of effusion in various conditions This book discusses the cytology of cerebrospinal fluid wherein the appropriate methods for studying this material are much the same as for serous fluids Organized into nine chapters this edition begins with an overview of the differential cell count from a serous fluid This text then presents the nomenclature and descriptions of cells of serous effusions Other chapters consider the cytological examinations of pleural or peritoneal fluid which often shed light on the diagnosis in leukemias and lymphomas This book discusses as well the general features of malignant effusions that may suggest the diagnosis The final chapter deals with the distinction between polymorphonuclear and lymphocytic types of meningeal exudate made from an examination of the cerebrospinal fluid This book is a valuable resource for pathologists and clinicians *Cancer Nursing* Connie Yarbro,Debra Wujcik,Barbara Holmes Gobel,2011 A new and revised version of this best selling reference For over eighteen years best selling Cancer Nursing Principles and Practice has provided oncology nurses with the latest information on new trends in the rapidly changing science of oncology Now in its Seventh Edition Cancer Nursing has been completely revised and updated to reflect key new developments New topics covered include targeted therapy hypersensitivity reactions mucositis and family and caregiver issues With 27 new chapters featuring insights from key authors the Seventh Edition is a must have resource for every oncology nurse District
