This book offers a fresh and innovative account of the history of environmentalism in the United States challenging the dominant narrative in the field In the widely held version of events the US environmental movement was born with the publication of Rachel Carson s *Silent Spring* in 1962 and was driven by the increased leisure and wealth of an educated middle class Chad Montrie s telling moves the origins of environmentalism much further back in time and attributes the growth of environmental awareness to working people and their families From the antebellum era to the end of the twentieth century ordinary Americans have been at the forefront of organizing to save themselves and their communities from environmental harm This interpretation is nothing short of a substantial recasting of the past giving a more accurate picture of what happened when and why at the beginnings of the environmental movement *The Garden* ,1895 *National Stockman and Farmer* ,1895 **Catalog** Sears, Roebuck and Company, 1931 Recording for the Blind & Dyslexic, ...
