Manglik, 2024-04-04 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Understanding Analog Side Channels Using Cryptography Algorithms Alenka Zajić, Milos Prvulovic, 2023-09-30 This book offers the latest research results on analog side channels and their usage in cybersecurity It demystifies analog side channels and demonstrates new use cases for them The first part of this book discusses how analog side channels are generated the physics behind it the modeling and measurements of analog side channels and their analogies to wireless communication systems The second part of this book introduces new applications that benefit from leveraging side channels In addition to breaking cryptography algorithms it demonstrates how analog side channels can be used for malware detection program profiling hardware profiling hardware software attestation hardware identification and hardware Trojan detection Side channel is one of the methods for obtaining information about program execution Traditionally they are used in computer science to extract information about a key in cryptographic algorithms What makes them different from other ways of extracting information about program execution is that side channels rely on how a system implements program execution rather than what the program s algorithm specifies Analog side channels are particularly powerful because they are not easy to suppress or detect that someone is collecting information from the system Although they are very powerful tools they are poorly understood This book targets advanced level students in computer science and electrical engineering as a textbook Researchers and professionals working with analog side channels how to model them measure them improve signal to noise ratio and invent new signal processing techniques can also use this book Computer scientists and engineers who want to learn new applications of side channels to improve system security new techniques for breaking cryptography keys new techniques for attestation and new techniques for hardware Trojan detection will also want to purchase this book

Cross-Cultural Design P.L.Patrick Rau,2014-06-02 This volume constitutes the refereed proceedings of the 6th International Conference on Cross Cultural Design CCD 2014 held as part of the 16th International Conference on Human Computer Interaction HCI International 2014 held in Heraklion Crete Greece jointly with 13 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from numerous submissions The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems They thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 76 papers included in this volume deal with the following topics cross cultural product and service design cross cultural issues in interaction social aspects and implications of cross cultural design cross cultural issues in e commerce marketing and branding cross cultural design for knowledge sharing and learning cross cultural design for the smart city and cross cultural design for creativity

Advances in Computer Entertainment Dennis Reidsma,Katayose Haruhiro,Anton Nijholt,2013-11-08 This book constitutes the refereed conference proceedings of the 10th International Conference on Advances in Computer Entertainment ACE 2013 held in Boekelo The Netherlands in November 2013 The 19 full paper and 16 short papers presented together 42 extended abstracts were carefully reviewed and selected from a total of 133 submissions in all categories The papers cover topics across a wide spectrum of disciplines including new devices evaluation and user studies games as interface to serious applications creating immersion interfaces new experiences procedural approaches and AI and theory Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications
