As a result, I don't understand the existing literature. The problem is the terminology. The paper by Smith is written in layman's terms. The last sentence of the introduction is the clearest. "Rational choice economics is based on a theory of the firm that says that firms are profit maximizers." But there is no explanation of what this means. The paper by Smith is written in layman's terms. The last sentence of the introduction is the clearest. This method for identifying a single subject as a responder to a stimulus is commonly called *subject's best guess* or the *best-subject-with-best-guess* method. A subject of exceptional ability, or one who has a high number of hits, is the subject of the stimulus test. A subject of average ability is the subject of the test.

This chapter has provided information about the various types of research designs used in psychology. Each design has its own strengths and weaknesses, and it is important to understand these differences in order to evaluate research findings critically.
