The DEH Reference Book, 1990 **Engineering and Design**, 1989 This manual provides guidance for the safe design and economical construction of retaining and flood walls This manual is intended primarily for retaining walls which will be subjected to hydraulic loadings such as flowing water submergence wave action and spray exposure to chemically contaminated atmosphere and or severe climatic conditions For the design of retaining walls which will not be subjected to hydraulic loadings or severe environmental conditions as described above TM S 818 1 may be used for computing the loadings and evaluating the stability of the structure **Index of Publications** United States. Army. Corps of Engineers, 1993

The DPW/DEH Reference Book, 1993 Engineering and Design United States. Army. Corps of Engineers, 1994 The purpose of this manual is to provide information and guidance for the investigation and selection of concrete materials for civil works concrete structures Elements discussed include design studies and reports preparation of contract plans and specifications construction preparation and concrete construction quality verification Emphasis is placed on the problems of concrete for hydraulic structures Roller compacted concrete shotcrete rigid pavement architectural concrete and concrete for repairs are not included These subjects are discussed in EM 1110 2 2006 Roller Compacted Concrete EM 1110 2 2005 Standard Practice for Shotcrete TM 5 822 7 Standard Practice for Concrete Pavements EM 1110 1 2009 Architectural Concrete and EM 1110 2 2002 Evaluation and Repair of Concrete Structures respectively **Index of Publications, Forms, Reports** United States. Army. Corps of Engineers, **Standard Practice for Concrete for Civil Works Structures** American Society of Civil Engineers, 1994 **Concrete Construction Handbook** Joseph J. Waddell, Joseph A. Dobrowolski, 1993 The third edition of this classic brings the most up to date information on all aspects of concrete technology and construction Table of Contents Section 1 Materials for Concrete Section 2 Properties of Concrete Section 3 Proportioning Mixtures and Testing Section 4 Framework and Shoring Section 5 Batching Mixing and Transporting Section 6 Placing Concrete Section 7 Finishing and Curing Section 8 Special Concrete and Techniques Section 9 Advanced Building Construction Systems Section 10 Specialized Practices Section 11 Precast and Prestressed Concrete Section 12 Architectural Concrete Section 13 Repair of Concrete Index **Use of Permeable Formwork in Placing and Curing Concrete** P. G. Malone, 1999 Permeable framework is a special class of lined formwork used to produce improvements in the strength and durability of concrete The bracing and the liner in the formwork are engineered to resist the pressure of plastic or fresh concrete but to allow trapped air and excess water to pass through and be removed during concrete placement and consolidation The objective in using permeable formwork is to eliminate voids on the surface of the concrete bug holes and to increase the strength and durability of the concrete surface immediately behind the formwork A review of permeable formwork and its use in placing concrete was conducted Methods techniques and materials are discussed and example applications are described Benefits of using permeable formwork include a reduction in bug holes and surface defects

improved resistance to freezing and thawing reduced rates of surface carbonation and chloride ion infiltration increased surface strength reduced form coating requirements reduced efforts in curing and reduced surface preparation for coating The cost of using permeable formwork varies greatly among job sites However the cost of using permeable formwork will generally be double that for conventional impermeable formwork Cost savings can be realized in the extended life of any wooden formwork used behind the filter fabric the ability to proceed without applying form release compounds the decreased cost of final surface preparation if coatings are to be applied to the finished concrete and the increased service life of the finished concrete
