

Fault Code Retrieval/Clearing AutoShift™ Gen3

Retrieving Fault Codes

- Place the shift lever in neutral.
- Set the parking brake.
- Turn the ignition key ON but do not start the engine. If the engine is already running, you may still retrieve codes, however, do not engage the starter if engine stalls.
- To Retrieve Active Codes:** Start with the key in the ON position. Turn the key OFF and ON two times within five seconds ending with the key in the ON position. After five seconds, the gear display begins flashing two-digit fault codes. If there are no active codes the gear display will show code 25, followed by PD (Product Diagnostic mode). The vehicle will not start in PD mode. You must turn vehicle key OFF and allow the system to power down to exit PD mode before restarting. **To start engine turn key off and wait for the transmission to power down.**
- To Retrieve Inactive Codes:** Start with the key in the ON position. Turn the key OFF and ON four times within five seconds ending with the key in the ON position. After five seconds, the gear display begins flashing two-digit fault codes. If no codes are active, the gear display will flash code 25 (no codes).
- Two digit fault codes will be displayed in the gear display. Record the codes. A one or two second pause separates each stored code, and the sequence automatically repeats after all codes have been flashed.

Clearing Fault Codes

- Start with the key in the ON position. Turn the key OFF and ON six times within five seconds, ending with the key in the ON position.
Note: If the codes have been successfully cleared, the service lamp will come on and stay on for five seconds.
- Turn the key OFF and allow system to power down.
