Professional Uncertainty, Knowledge and Relationship in the Classroom Joseph Mintz, 2014-06-27 The extent to which  
 teachers should make use of theoretical and expert knowledge as opposed to tacit experiential knowledge and how these  
 might be combined is a perennial issue in discussions on pedagogy This book addresses these debates through a creative  
 development of the concept of productive uncertainty Using case studies focusing on teachers working with children with  
 autism a particularly fertile crucible for considering uncertainty the book explores how the radical 20th century

psychoanalyst Wilfred Bion's epistemological approach to uncertainty can be used to re frame Donald Schön's concept of reflection in action offering a new perspective on the practice of teachers and other caring professionals Several areas of potential uncertainty are identified including uncertainty relating to areas of practice including diagnosis the relationship between expert knowledge and practice the implications of autism for autonomy and agency and uncertainties in relation to the understanding of and use of new technologies A strong argument is made based on both theoretical and empirical grounds that in juggling between theoretical and tacit knowledge in the classroom there is more to be gained by staying with the struggle with uncertainty than by fleeing from it too early into the promise of expert solutions Consideration is also given to the relative importance of specific theoretical training for teachers both in general and in relation to working with children with special educational needs in the context of international and UK policy developments in this area This book will be of key value to researchers and postgraduates in the fields of education studies teacher thinking and research
