multifaceted analysis of this new wave of Chinese students based on research in both Chinese high schools and American higher education institutions Ma argues that these students experiences embody the duality of ambition and anxiety that arises from transformative social changes in China These students and their families have the ambition to navigate two very different educational systems and societies Yet the intricacy and pressure of these systems generate a great deal of anxiety from applying to colleges before arriving to studying and socializing on campus and to looking ahead upon graduation Ambitious and Anxious also considers policy implications for American colleges and universities including recruitment student experiences faculty support and career services

Don't Send Him in Tomorrow Jarlath O'Brien, 2016-08-04 In Don't Send Him in Tomorrow Jarlath O'Brien shines a light on the marginalised disenfranchised and forgotten children of today's schools The percentage of children achieving the government's expected standard in benchmark tests is national news every year The progress that children with learning difficulties and SEN make is never discussed because it is not understood That is a problem The bone crushing infrastructure which professionals have to negotiate is a problem The fact that so many parents have to fight tooth and nail so that the needs of their children are met something the rest of us would consider a basic entitlement is a problem This book describes how the system can be improved if and when these marginalised children are given higher priority by the powers that be There is a widespread lack of understanding about special schools the work they do and the children they educate the sector is largely invisible Jarlath O'Brien has become increasingly frustrated by this and the varying quality of provision for children with learning difficulties and SEN in mainstream schools The successes of special schools and pupil referral units in Ofsted inspections are just not celebrated or analysed in the same way that mainstream schools are While mainstream schools have their hands tied by fears over progress measures There is a human cost to the accountability culture that reduces schooling to data and judgements this is felt most profoundly by children with SEN and their families Jarlath shares some of the problems he's witnessed with inclusion and exclusion mainstream schools actively encouraging children with SEN to look elsewhere parents reporting their children have been formally or informally excluded from school and socially excluded by the parents of other children children asked to leave their mainstream schools because of their behaviour usually behaviour that is caused by their needs not being adequately addressed children who are in school but isolated from their peers If a child can't participate in activities or trips with the rest of the class or spends much of the day working one to one with a teaching assistant is this really inclusion The Pupil Premium has been established to ensure that children in receipt of free school meals are not disadvantaged why does something similar not exist for children with SEN Every health and wealth indicator that you could use to measure people with learning difficulties and special educational needs SEN reveals something alarming They die younger They work less They are more likely to live in poverty or end up in prison or face mental health difficulties They are much more likely to be excluded from school They are more likely to be bullied at school This has to end We all have to choose to commit to
