prescribing opioids to treat acute pain indications The recommendations of this study will assist professional societies health care organizations and local state and national agencies to develop clinical practice guidelines for opioid prescribing for acute pain Such a framework could inform the development of opioid prescribing guidelines and ensure systematic and standardized methods for evaluating evidence translating knowledge and formulating recommendations for practice

What Makes a World-Class School and How We Can Get There James H. Stronge,Xianxuan Xu,2017-06-15 For years students in the United States have lagged behind students in many other countries on such measures of achievement as the PISA and TIMSS assessments In an increasingly globalized world such a gap is worrisome Armed with statistics examples and cautionary tales from Scandinavia to Japan James H Stronge and Xianxuan Xu have written a book that can help educators better prepare students and close that gap In What Makes a World Class School and How We Can Get There you will find Careful analysis of recent international assessment results what they mean and what can be done to improve them In depth profiles of high achieving education systems around the globe their histories their lessons learned and what they can teach educators and policymakers in the United States Strategies for aligning successful educational approaches from international systems to U S schools which strategies to use in which subjects and with which students Transformative ideas for cultivating a truly world class system of schooling both simple and complex ways to raise the bar for all students no matter what their background Educators in every country must ensure that their students are as prepared as possible to lead a future generation of citizens This thought provoking and copiously researched book provides educators with a blueprint for radical improvement based on the hard learned experiences of their peers around the world **The Opposite of Cheating**

Tricia Bertram Gallant,David A. Rettinger,2025-03-11 In these days of an ever expanding internet generative AI and term paper mills students may find it too easy and tempting to cheat and teachers may think they can t keep up What s needed and what Tricia Bertram Gallant and David A Rettinger offer in this timely book is a new approach one that works with the realities of the twenty first century not just to protect academic integrity but also to maximize opportunities for students to learn The Opposite of Cheating presents a positive forward looking research backed vision for what classroom integrity can look like in the GenAI era both in cyberspace and on campus Accordingly the book outlines workable measures teachers can use to better understand why students cheat and to prevent cheating while aiming to enhance learning and integrity Bertram Gallant and Rettinger provide practical suggestions to help faculty revise the conversation around integrity refocus classes and students on learning reconsider the structure and goals of assessment and generally reframe our response to cheating At the core of this strategy is a call for teachers academic staff institutional leaders and administrators to rethink how we show up for students and to reinforce and fully support quality teaching learning and assessment With its evidentiary basis and its useful tips for instructors across disciplines levels of experience and modes of instruction this book offers a much needed chance to pause rethink our purpose and refocus on what matters creating classes that center human interactions that foster

the personal and professional growth of our students **Making Kids Cleverer** David Didau, 2018-12-20 In *Making Kids Cleverer* A manifesto for closing the advantage gap David Didau reignites the nature vs nurture debate around intelligence and offers research informed guidance on how teachers can help their students acquire a robust store of knowledge and skills that is both powerful and useful Foreword by Paul A Kirschner Given the choice who wouldn't want to be cleverer What teacher wouldn't want this for their students and what parent wouldn't wish it for their children When David started researching this book he thought the answers to the above were obvious But it turns out that the very idea of measuring and increasing children's intelligence makes many people extremely uncomfortable If some people were more intelligent where would that leave those of us who weren't The question of whether or not we can get cleverer is a crucial one If you believe that intelligence is hereditary and environmental effects are trivial you may be sceptical But environment does matter and it matters most for children from the most socially disadvantaged backgrounds those who not only have the most to gain but who are also the ones most likely to gain from our efforts to make all kids cleverer And one thing we can be fairly sure will raise children's intelligence is sending them to school In this wide ranging enquiry into psychology sociology philosophy and cognitive science David argues that with greater access to culturally accumulated information taught explicitly within a knowledge rich curriculum children are more likely to become cleverer to think more critically and subsequently to live happier healthier and more secure lives Furthermore by sharing valuable insights into what children truly need to learn during their formative school years he sets out the numerous practical ways in which policy makers and school leaders can make better choices about organising schools and how teachers can communicate the knowledge that will make the most difference to young people as effectively and efficiently as possible David underpins his discussion with an exploration of the evolutionary basis for learning and also untangles the forms of practice teachers should be engaging their students in to ensure that they are acquiring expertise not just consolidating mistakes and misconceptions There are so many competing suggestions as to how we should improve education that knowing how to act can seem an impossible challenge Once you have absorbed the arguments in this book however David hopes you will find the simple question that he asks himself whenever he encounters new ideas and initiatives Will this make children cleverer as useful as he does Suitable for teachers school leaders policy makers and anyone involved in education
