

THE HUMAN BODY: AN ORIENTATION

Most of us think of anatomy as bones and muscles, and physiology as systems and processes. In fact, these two fields, which have developed in rather easily distinguishable ways, are extremely closely intertwined in the human body. In fact, the two fields are so closely intertwined that they are often considered as a single discipline, and the study of the human body is often considered as a single discipline.

The study of the human body is often considered as a single discipline, and the study of the human body is often considered as a single discipline. The study of the human body is often considered as a single discipline, and the study of the human body is often considered as a single discipline.
