Electrical Power System Protection C. Christopoulos,A. Wright,2013-04-18 The death of Professor Arthur Wright in
the summer of 1996 deprived me of a friend and a colleague whose judgement and experience shaped this book I pay tribute
to his contributions to protection and electrical engineering education In the five years since the first edition appeared many
developments have taken place and it is now necessary to update the book The use of digital communications and advanced
signal processing techniques is now widespread and several fully numeric relays are available from manu facturers Two new
Chapters 13 and 14 have been added to introduce readers to these concepts and associated techniques Artificial intelligence
is making its impact in all engineering applications and power system protection is no exception Expert systems fuzzy logic
artificial neural networks adaptive and integrated protection synchronized measurements using the global positioning system
genetic algorithms flexible a c transmission systems are some of the techniques considered in connection with protection
Although many of these techniques have not yet found major application in protection it is nevertheless essential for the
educated protection engineer to have a basic understanding of the underlying principles and methodology so that he or she
can evaluate their suitability for new relaying problems and applications Chapter 15 was therefore added to guide readers
through this developing area I have also added some new material in other chapters to reflect changes over the past years

IEEE Std C37.96-2012 (Revision of IEEE Std C37.96-2000) - Redline ,2013 **Protective Relaying** Walter A.
Elmore,2003-09-09 Targeting the latest microprocessor technologies for more sophisticated applications in the field of power
system short circuit detection this revised and updated source imparts fundamental concepts and breakthrough science for
the isolation of faulty equipment and minimization of damage in power system apparatus The Second Edition clearly
