Dakin, Robert G. W. Brown, 2010-12-12 A field as diverse as optoelectronics needs a reference that is equally versatile From basic physics and light sources to devices and state of the art applications the Handbook of Optoelectronics provides comprehensive self contained coverage of

fundamental concepts and practical applications across the entire spectrum of disciplines encompassed by optoelectronics. The handbook unifies a broad array of current research areas with a forward looking focus on systems and applications. Beginning with an introduction to the relevant principles of physics, materials science, engineering and optics, the book explores the details of optoelectronic devices and techniques including semiconductor lasers, optical detectors and receivers, optical fiber devices, modulators, amplifiers, integrated optics, LEDs and engineered optical materials. Applications and systems then become the focus with sections devoted to industrial, medical and commercial applications, communications, imaging and displays, sensing and data processing, spectroscopic analysis, the art of practical optoelectronics and future prospects. This extensive resource comprises the efforts of more than 70 world renowned experts from leading industrial and academic institutions around the world and includes many references to contemporary works. Whether used as a field reference, as a research tool or as a broad and self contained introduction to the field, the Handbook of Optoelectronics places everything you need in a unified, conveniently organized format.

Handbook of Corrosion Data Bruce D. Craig, David S. Anderson, 1994-12-31. This book makes it easy for you to find what effect environment has on the corrosion of metals and alloys. However, this volume offers information on additional environments including concrete, soil, groundwater, distilled water, sodium acetate and more. There's also updated and expanded coverage of previously discussed environments as well as information on environments which deal with the dairy food, brewing, aerospace, petrochemical and building industries. The environments are listed alphabetically. Each listing includes a general description of the conditions, a comment on the corrosion characteristics of various alloys in such a situation, a bibliography of recent articles specific to the environment.
