Readings in the Economics of Industrial Organization Douglas Needham, 1971 *Recent Developments in the Theory of Industrial Organization* Alfredo Del Monte, 1992 These are times of profound structural change They are also times of great uncertainty as new forms of organization and market behavior emerge to replace and reshape older forms Nowhere is this uncertainty felt more than in industrial organization theory Notwithstanding the revolution it has undergone in the last decade due to the development of new tools and directions of analysis the discipline has yet to create a coherent new body of thought This book in bringing together the work of academics who have all played a major role in injecting new life into the discipline is an attempt to move toward this goal Opening with an introduction by Alfredo Del Monte to the terms of the new debate relating to the rise of the new technological behavioral and organizational forms the book moves on to consider the contribution of three new approaches to industrial organization theory John Sutton and Giovanni Dosi assess respectively the contribution of game theory and the evolutionary approach while John Hey reviews the application of experimental methods Following chapters by Malcolm Sawyer and Keith Cowling assess the relationship between structure and the characteristics of the industrial system as a whole while Alfredo Del Monte and Fabio Esposito then discuss the significance of intra industry differences related to variations in the flexibility of organizational structure The contribution by Roberta Marchionatti and Francesco Silva using the Italian case as an example illustrates the impact of public intervention on industrial structure Subsequently theoretical issues regarding the internal organization of the firm are examined by Neil Kay who assesses the joint venture as a particular form of collaborative activity and by Nicola Acocella who reviews different theories of the multinational firm Another contribution to this set of chapters on the theory of the firm is Ricardo Martinasson on the duopoly setting The book concludes with three chapters respectively by Paul Stoneman Damiano Silipo Neil O Higgins and Patrizia Sbriglia on different issues concerning the relationship between technical progress and market structure
