Techwise Infant and Toddler Teachers Patricia A. Cantor, Mary M. Cornish, 2016-10-01 Infants and toddlers the so called touchscreen generation are living in a screen mediasaturated world They are the target market for ever growing numbers of apps TV shows electronic toys and e books Making sense of the complex issues associated with screen media in the lives of children under 3 can be challenging for the adults who care for them There is a strong need among teachers and parents of infants and toddlers for guidance related to the appropriate role of screen media in early care and education Unlike most other books about technology in early childhood this book focuses specifically on infants and toddlers It explores why and how infant and toddler teachers need to be techwise in order to understand the implications of screen media for children s learning and development The book serves as a single accessible resource to relevant research findings from the fields of pediatric medicine child development developmental psychology social and behavioral sciences and brain science It provides infant toddler teachers with a comprehensive approach and strategies to guide their decisionmaking and promote practices that are evidence based family centered culturally responsive and collaborative It is a call for teachers to think carefully and act wisely when making decisions about screen media both the technology that they are encountering now and the technology they will encounter in the future in order to optimize the learning and healthy development of infants and toddlers

Perceptual and Cognitive Development Rochel Gelman, Terry Kit-Fong Au, 1996-06-17 Perceptual and Cognitive Development illustrates how the developmental approach yields fundamental contributions to our understanding of perception and cognition as a whole The book discusses how to relate developmental comparative and neurological considerations to early learning and development and it presents fundamental problems in cognition and language such as the acquisition of a coherent organized and shared understanding of concepts and language Discussions of learning memory attention and problem solving are embedded within specific accounts of the neurological status of developing minds and the nature of knowledge Research advances and theoretical reorientations are updated in the Second Edition the revision focuses more attention on the cognitive and biological sciences and neuroscience Illustrates how the developmental approach can yield fundamental contributions to our understanding of perception and cognition as a whole Discussions of learning memory and attention permeate individual chapters
