The centrality of critical infrastructure in the Obama administration's recent cybersecurity initiatives demonstrates the timeliness of this topic for greater review and scholarly input. In this manner, articles in this issue uncover the role and extent of international law and norms, public-private cooperation, as well as novel ways of conceptualizing security in efforts to improve critical infrastructure cybersecurity. Other pieces provide case studies on the telecommunications, power, and energy sectors to generate an in-depth understanding of specific responses to security concerns in different infrastructure areas. Additional contributions examine regulatory activities in cyberspace, the potential value of cryptocurrency, the evolution of cloud computing, cybersecurity in Brazil, as well as the integration of cyber in the military strategies of Russia, China, and the United States. The diversity of these topics demonstrates the Journal's continued commitment to pursuing the myriad facets that compromise the field of cyber. Congressional Record United States. Congress, 1991 **Military Aspects of Geology** E. P. F. Rose, J. Ehlen, U. L. Lawrence, 2019-01-31 This book complements the Geological Society's Special Publication 362 *Military Aspects of Hydrogeology*. Generated under the auspices of the Society's History of Geology and Engineering Groups, it contains papers from authors in the UK, USA, Germany, and Austria. Substantial papers describe some innovative engineering activities influenced by geology undertaken by the armed forces of the opposing nations in World War I. These activities were reactivated and developed in World War II. Examples include trenching from World War I, tunnelling, and quarrying from both wars, and the use of geologists to aid German coastal fortification and Allied aerial photographic interpretation in World War II. The extensive introduction and other chapters reveal that military geology has a longer history. These chapters relate to pre-twentieth century coastal fortification in the UK and the USA, conflict in the American Civil War, long-term going assessments for German forces, tunnel repair after wartime route denial in Hong Kong, and tunnel detection after recent insurgent improvisation in Iraq. **The Middle East and South Asia 2019-2020**, 2019-10-09 More than a quarter of the world's population live in the Middle East and South Asia, yet our knowledge and understanding of the region is often limited to news updates about the latest conflicts and crises.
