Knowledge Barbara Herrnstein Smith,2006-01-05 This book explores the radical reconceptions of knowledge and science emerging from constructivist epistemology social studies of science and contemporary cognitive science Smith reviews the key issues involved in the twentieth century critiques of traditional views of human knowledge and scientific truth and gives an extensively informed explanation of the alternative accounts developed by Fleck Kuhn Foucault Latour and others She also addresses the various anxieties e g over relativism and wars occasioned by these developments placing them in their historical contexts and arguing that they are largely misplaced or spurious Smith then examines the currently perplexed relations between the natural and human sciences the grandiose claims and dubious methods of evolutionary psychology and the complex play of naturalist humanist and posthumanist ideologies in contemporary views of the relation between humans and animals

The Mosquito Confederation Daniel Mendiola,2025-04 The Mosquito Confederation is the first historical monograph to offer a thorough chronological narrative of the rise and decline of the Mosquito Confederation a powerful alliance of Amerindian and African descended peoples that dominated much of Central America s Caribbean coast throughout the eighteenth century This study addresses a straightforward set of questions Who were the principal actors facilitating Mosquito expansion What specific practices did they implement And how did these processes shape the competing Spanish and English conquests in the region The specific answers to these questions vary over place and time yet the overarching argument is that the rise and decline of the Mosquito Confederation a process that depended far more on the novel practices of Mosquito leaders than on outside colonial influences was the driving force shaping imperial outcomes in the region This research derives from a substantial body of previously uncited sources especially from the National Archive of Costa Rica Since Mosquito fleets routinely stopped in Costa Rican ports to trade and gather supplies the Costa Rican archival record is both uniquely large and uniquely insightful These sources fill critical gaps in Mosquito history especially in the first half of the century making it possible for the first time to write a chronological narrative of contextualized events throughout the century
