

# KAWASAKI KZ750N SPECTRE

*High Performance And  
Shaft Drive With Cruiser Styling.*

Motorcycles are fun and just at the top is the way they look. Personality looks come in three categories: standard, which is the median; semi-standard; and sports, which is the most extreme. The Kawasaki KZ750N Spectre is a semi-standard bike, with low bars, some

exposed pipe and something resembling a cruiser profile, and cruising with high pull-back bars, stepped seat, small tank and fat rear tire. These elements of design imply cruiser ideas, but someone that the cruiser buyer isn't concerned with performance, the styling must never make a gesture at his reflection in the rear-view mirror, etc.

Kawasaki knows better, and as proof they've come out with the Spectre, cruiser in looks, some high performance features as well as sports bars, and features like shaft drive, unadjustable compression and rubber engine mounts like those on the better touring machines.

The Spectre is the latest in a family of Kawasaki 750s that begins with the standard KZ750, goes with the funmost, high-riser 750 LTD, and goes faster with the super sports GP750.

Chrome is conspicuously absent. The gas tank, side covers and fenders are black with deep maroon panels outlined in gold. The exhaust pipes, cylinder, cylinder head, mirrors, control panel, levers and footpeg supports are painted black. The exhaust pipes and handlebars are black chrome. The footrests have rubber and rear shock absorber are hidden by black rubber covers. The wheels, fork sliders, shock covers, engine cover and cylinder head, even the metal wrap in the middle of the passenger grab bar, are painted gold. Sides of the wheel rims are natural aluminum, and the brake discs are the color of machine metal but everything else seems to be black or gold. The seat is stepped, the bars rise up and slope back, the pipe are forward and the taillight projects on a folded rear fender. The leading axle forks look longer than they are and in combination with the fat disk, give the side a semi-slopper. There's no mistaking the Spectre for a standard KZ750.

The difference results from, and go beyond, the styling. The leading axle forks lengthen the wheelbase, from the KZ's 57.3 in. to 58.4. The Spectre's front tire is a 110/90-19, the equivalent of a 1.50, while the KZ comes with a 1.25-19. The rear tire is a 130/90-16, equal to a 1.50-
