**Control Systems, Decision-Making, and Innovation Development** Dawid Szutowski, 2021-10-03 The systematic approach to innovation development today is one of the world's most prominent scientific fields and with good reason. When applied correctly, such a system produces regular outcomes which consistently drive lasting competitive advantage. Unfortunately, as much as it is beneficial, the orchestration of an undisturbed flow of multiple complex dynamic and flexible innovation development processes is structurally demanding. In this book, a recognised innovation management specialist sets the record straight, offering a comprehensive approach to the improvement of innovation efficiency with the use of management control systems. Unlike other books on the subject, it proposes original representation of the CDI model of the relationships between management control system, decision making quality and innovation system efficiency and explains why management control is fundamental to innovation management. In addition to that, inside the reader will find several original developments. These include the Info Deficiency ID model depicting the various parameters hindering decision making in innovation development, the product innovation development PID system offering the original function based approach to innovation management and the composite innovation index, specially designed tool intended to evaluate the efficiency of an innovation development system. It will be of interest to researchers, academics, practitioners and advanced students in the fields of management strategy and innovation. Chapter 4 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>. **Management Control Systems and Tools for Internationalization Success** Teixeira, Nuno
