No texto de leitura obrigatória para os estudiosos da responsabilidade civil ambiental são alinhavados e arquitetados arranjos científico-jurídicos para o enfrentamento da incerteza em sociedades complexas. Seu propósito auxiliar no adequado cumprimento da ordem superior inserida nas Cartas nacionais do Brasil e da Espanha, eis que em ambas determinado seja o meio ambiente valor fundamental preservado. Propõe o autor duas leituras do tema: ambas ofertadas pelo direito civil, responsabilizatória preventiva e outra precaucional. A primeira tecida a partir do estudo da teoria da perda de oportunidades discute o surgimento de um novo tipo de dano a chance desperdiçada em si mesma considerada e de uma causalidade parcial ou probabilística. A segunda promove o encontro do princípio da precaução com a teoria dos conjuntos fuzzy. Disso surgiu uma causalidade ambiental possibilística qualificada pela lógica difusa capaz de promover medidas precaucionais cientificamente justificadas e portanto sindicáveis. Com isso viu-se promovida a ressignificação do nexo causal e admitido outro nível de certeza responsabilizatória inserida nos domínios do direito de danos, agora por efeito da lógica difusa. **Estudios de impacto ambiental : manual práctico para su elaboración** José Enrique de Tomás Sánchez, 2013 **Managing Biogas Plants** Mario Alejandro Rosato, 2017-08-15 This practical manual provides basic theoretical knowledge about fermentative processes, biochemical laboratory techniques and an arsenal

Soft Computing for Hybrid Intelligent Systems

Oscar Castillo, Patricia Melin, Witold Pedrycz, 2008-09-10. We describe in this book new methods and applications of hybrid intelligent systems using soft computing techniques. Soft Computing (SC) consists of several intelligent computing paradigms including fuzzy logic, neural networks and evolutionary algorithms which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts which contain a group of papers around a similar subject. The first part consists of papers with the main theme of intelligent control which are basically papers that use hybrid systems to solve particular problems of control. The second part contains papers with the main theme of pattern recognition which are basically papers using soft computing techniques for achieving pattern recognition in different applications. The third part contains papers with the themes of intelligent agents and social systems which are papers that apply the ideas of agents and social behavior to solve real world problems. The fourth part contains papers that deal with the hardware implementation of intelligent systems for solving particular problems. The fifth part contains papers that deal with modeling, simulation and optimization for real world applications. *Engineering Applications of Bio-Inspired Artificial Neural Networks* Jose Mira, Juan V.

Sanchez-Andres, 1999-05-19. This book constitutes together with its companion LNCS 1606 the refereed proceedings of the International Work Conference on Artificial and Neural Networks IWANN 99 held in Alicante, Spain, in June 1999. The 91 revised papers presented were carefully reviewed and selected for inclusion in the book. This volume is devoted to applications of biologically inspired artificial neural networks in various engineering disciplines. The papers are organized in parts on artificial neural nets, simulation and implementation, image processing and engineering applications. *Manual de dificultades de aprendizaje* Jesús Nicasio García Sánchez, 2023-05-22. Por qué no aprenden a leer o escribir bien ciertos alumnos? ¿Cómo se detecta la causa de sus dificultades? Por qué no saben resolver problemas matemáticos? ¿Qué estrategias utilizar en el aula cotidianamente? El libro ofrece propuestas de solución a esta problemática. Las dificultades de aprendizaje al igual que cualquier trastorno han de acotarse respecto a otros y ha de estudiarse su heterogeneidad y naturaleza compleja que es la de la conducta humana.
