Algebra 2 Unit 13: Statistics Notes

Variability and Sampling

Data is everywhere. It's in our newspapers, it's in our science classes, it shows up in economics, medicine and anywhere else that variability occurs. Variability is simply the property of outcomes being different. The tools of statistics are designed to explore this variability. There are many types of variability. It is good to understand these sources in order to minimize the year that we are not studying.

Example 1   The following types of variability can change outcomes of a data set. For each give an example. Feel free to be bold.

(a) **Observational or Measurement Variability:** Variability that is introduced due to either not measuring observations well being precise enough, or deterioration in how two different people read the measurement.

2 students measure time for a ball to roll down a ramp
→ different reaction times

(b) **Natural Variability or Inter-Individual Variability:** Variability that accounts for the fact that members of populations are simply different.

2 people work out same amount of time
→ different people lose different amounts of weight

(c) **Induced Variability:** This type of variability is introduced into an experiment. It occurs because we have assigned our populations or sample to two or more treatment groups and then observe the variability between the groups.

2 groups taking a test, one group allowed to sleep
8 hours. other group only 4 hours → different scores

(d) **Sample Variability:** This is the type of variability that occurs when we take multiple samples from a population randomly. These samples will be different due to the randomness of the samples chosen.

multiple samples of people surveyed to determine
political candidate preference.

Remember, through all of our work in this unit, we are really trying to explain the variability of data within either a population or a sample and then using this to determine if the variability can be attributed to one of the factors above or the evolution of the others.
