## **English P2014november Grade10:**

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

### **Standards of English in Higher Education**

Neil Murray, 2015-10-22 The student demographic of universities today has changed quite dramatically from even a decade ago. As universities seek to internationalise, widen participation and derive attendant reputational and financial benefits along with greater opportunities for research collaborations and industry links, they also face a growing challenge associated with what Neil Murray terms the English language question. In particular, as the proportion of students of non-English speaking backgrounds entering universities increases, there is growing concern over levels of language proficiency and what this can mean for educational standards, the student experience and ultimately institutional standing. Standards of English in Higher Education unpacks a number of key and interrelated issues, for example the assessment of proficiency and the structure and nature of provision that bear on the question of English language standards, and in doing so offers a frank and critical appraisal of English language in higher education today.
