Sub Code 107

Total Marks : 100

Time : 3 hours

English (Compulsory) 1st Paper

Part A: Reading Test (50 Marks)

Read the passage. Then answer the questions below.

Change is life, change is progress, change is culture and civilization, while stagnation is the arrest of development, is nothing but decay, death and destruction. Nothing great in the world is static, everything noble is dynamic. Evolution and revolution is the law of nature. It is at the root of all progress, all information, all development. Time has always been on the move and there are ups and downs, rises and falls of all human civilizations, human culture and there is development in man's test and zest, inclination and motives, liking and disliking. Monotony is distaste; variety is the spice of life; change is life and its zest, its interest and its meaning. In human institutions rise and fall happen and old order and discipline, old rules and regulations. Old systems and process everything yields to new, surrenders to new conditions and demands. If there were no changes, our life would be dull, dreary and meaningless. Our life is livable, romantic and desirable only because of change alternation, modification and novelty.

Because of this change of taste and zest, motives and inclinations we have seen kingdoms and democratic states, capitalism and socialism, nationalism and internationalism to speak bluntly the secret of nations' strength rests basically on the capacity for change and readjustment.

There have been radical changes and gradual changes in human history of civilization. In either case of violent and smooth change, human civilization may be beset with dangers and difficulties, odds and disadvantages but the laws of life and nature continue working. Nothing remains in its state.

In short the old ideas and old values of life become weakened and disintegrated with the progress of time, new ideas and new values of life, no matter social, political, cultural, religious, emerge out of debris of the old.
