

The background of the book cover features a traditional East Asian ink wash painting. It depicts two figures, possibly scholars or monks, seated on a rocky outcrop. The figure on the left is shown in profile, looking towards the right. The figure on the right is facing slightly away from the viewer, looking down at an object in their hands. The style is minimalist, with bold black ink strokes for the figures and more delicate, lighter strokes for the surrounding landscape, which includes some foliage and a distant structure. The overall tone is contemplative and artistic.

Enlightened Or Mad A Psychologist Glimpses Into Mystical Magnanimity:

Enlightened Or Mad? a Psychologist Glimpses Into Mystical Magnanimity David y. F. Ho, 2014-11-01 *Enlightened or Mad A Psychologist Glimpses into Mystical Magnanimity* tells the story of the author's life as a journey of spiritual discoveries in the East and the West. This is a journey in quest of an integrated identity, sense of self, mastery and new directions to lead a good life in short spiritual fulfillment. Spirituality then provides the unifying theme and context to interpret experiences normal and abnormal in China and the United States. Spirituality derives creative energy from madness to reach new heights; madness receives the healing, calming effects of spirituality to become benign. Wedded to ecumenicity, spirituality dissolves ethnic or cultural boundaries, fosters universal love and promotes world citizenship. *Rewriting Psychology* David Y. F. Ho, 2019-06-15 Of what use is psychology if it does not help to solve the pressing problems of the day at the individual and collective levels? This is no less a pointed question to the reader as it is to the author that sets the stage for an adventurous sharing of ideas. The author shies away from providing ready-made answers but spares no effort in stirring the reader to ponder questions about human nature and behavior. Soon the reader will react with the exclamation, "Ah, this book is about me, useful to my life." In this way, the book serves to bridge the gap between academia and the general public. As the reader may well expect, bold assertions may be found throughout this volume. For instance, Piaget's stage of formal operations does not represent the final or highest level of cognitive development; rather, dialectical thinking is the apex of human cognition. Viewpoints may be controversial, such as cautioning against importing Confucian education into America, the possibility that madness may enrich your life, raising the question if Trump is immoral, mentally deranged or both. The present offering is at once audacious and provocative. Having raised the question about the abysmal status of psychology, the author feels compelled to take on the challenge of rewriting an academic discipline. The reader is invited to consider new visions for psychology's future development, both scientific and practical. Fresh materials or distinctive features seldom found elsewhere are presented: the author's secret thoughts and self-revelations, a discussion on the birth of evil and reinterpretation of the fall of humankind. All these expand the traditional boundaries of psychology and bring it closer to being a science relevant to the human condition.

Systemic Humiliation in America Daniel Rothbart, 2018-03-30 This volume explores contemporary social conflict focusing on a sort of violence that rarely receives coverage in the evening news. This violence occurs when powerful institutions seek to manipulate the thoughts of marginalized people, manufacturing their feelings and fostering a sense of inferiority for the purpose of disciplinary control. Many American institutions strategically orchestrate this psychic violence through tactics of systemic humiliation. This book reveals how certain countermeasures based in a commitment to human dignity and respect for every person's inherent moral worth can combat this violence. Rothbart and other contributors showcase various examples of this tug of war in the US, including the politics of race and class in the 2016 presidential campaign, the dehumanizing treatment of people with mental disabilities and destructive

parenting styles that foster cycles of humiliation and emotional pain Rewriting Cultural Psychology David Y. F. Ho, 2019-10-15 This volume is addressed to scholars as well as a popular audience aimed to bridge the gap between academia and the general public It deals with who we are concerning our sense of self and identity and how we live concerning our ways of life in diverse cultures It affirms that we may transcend our cultural ethnic roots and redefine our identities individual or collective Transcendence opens the door not only to personal transformation but also to confront ethnic stereotypes and prejudices Readers will gain fresh cultural knowledge from both the East and the West and be attuned to the theme of letting no ethnic group be alien to us This book is at once about the immersion of life in culture and the remaking of culture by human action reciprocal influence at work The idea of immersion underscores the powerful cultural forces that shape our perceptions thinking and emotions Unlike other cultural psychology texts this volume dwells on the accelerating alterations of culture by human action and hence the remaking of our own being in the age of the Internet In the author s own words I write with the passion of a person who has lived life from being marginal neither Eastern nor Western to being a world citizen turned to English like a duck to the water thus circumventing my handicap of Chinese orthographic dyslexia I have two cultural parents one Chinese and one Western who transformed me into a thoroughly bilingual bicultural person empowered to build intercultural bridges The East is rising and the West can ill afford to remain ignorant of the East
