Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as recognition of prior learning, access for students with disabilities, work-integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development, models and funding, and micro-credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting open learning as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural, and political obstacles facing PSET, drawing on Nancy Fraser's theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to thrive. This volume emerges from research conducted by the Cases on Open Learning (COOL) project, an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town (UCT) in South Africa. **Form 1 RCA - Application for Admission to a Diploma Course at the College (Pages: 2)** Great Britain.
