

A survey of the research on NLE conducted in Chapter 6 continues the threads of discussion engaged in earlier chapters. The discussion correlating NLE with African-American dialects is continued here, with references to research by Clarke (2006) and others. The survey of research also serves to demonstrate the centrality of author Sandra Clarke as a scholar of NLE. Concluding with a survey of literature might seem counter-intuitive to some readers but this is a stylistic feature of all books in the *Dialects of English* series. Concluding with the survey serves to highlight how this particular volume contributes to the literature and where gaps exist, notably in the study of prosodic features of NLE and the segmental and suprasegmental features of contact varieties of Aboriginal English spoken by populations of Labrador. The final chapter of the book provides longer versions of the sample texts that are referenced in brief throughout the text. This allows readers to peruse the texts at length along with the corresponding audio files archived on the publisher's website (www.jel.ed.ac.uk/dialects/). The author also offers a description of the context in which the text was produced.

In summary, Sandra Clarke is recognized as a leading scholar in the study of NLE whose book offers a culturally situated examination of features of divergent forms of NLE phonology, morphology, and lexicology. The book is valuable for the specificity with which it tracks the multiple sound and structure differences encompassed within NLE and for its wide variety of archival and media resources that allow readers to experience the richness of NLE both over time and across a variety of socio-cultural contexts. The systematic thorough approach of the book makes it highly relevant to linguistics scholars and accessible for scholars in cognate fields. This book is a worthwhile volume for those who are interested in the study of NLE.

Event Representation In Language And Cognition:

Event Representation in Language and Cognition Jürgen Bohnemeyer, Eric Pederson, 2010-12-23 Event

Representation in Language and Cognition examines new research into how the mind deals with the experience of events. Empirical research into the cognitive processes involved when people view events and talk about them is still a young field. The chapters by leading experts draw on data from the description of events in spoken and signed languages first and second language acquisition co speech gesture and eye movements during language production and from non linguistic categorization and other tasks. The book highlights newly found evidence for how perception thought and language constrain each other in the experience of events. It will be of particular interest to linguists psychologists and philosophers as well as to anyone interested in the representation and processing of events.

The Representation of Motion Events in English and German Katharina Zaychenko, 2024-11-18 The encoding of motion event components is a central element in determining the nature of linguistic and conceptual representations underlying motion event construal. This work approaches the verbalization and conceptualization of motion events in German and English from a theoretical point of view and on the basis of a corpus study an online survey and an in person experiment. The research focuses on the investigation of different factors determining motion event construal of native speakers and learners by examining cognitive variables i.e. visual endpoint salience and cognitive cost caused by non habitual aspect use and grammatical factors i.e. grammatical viewpoint aspect.

The Segmentation and Representation of Translocative Motion Events in English and Chinese Discourse

Guofeng Zheng, 2020-12-01 This book provides a systematic contrastive analysis of the segmentation and representation of English and Chinese Translocative Motion Events (TMEs) which possess Macro Event Property (MEP). It addresses all the issues critical to understanding TMEs in English and Chinese from event segmentation MEP principles and the conceptual structure of TMEs and their constituents to the representation of Actant Motion Path and Ground. The book argues that the corpus based alignment for the TME segmentation in both languages the parameters of Actant Motion Path and Ground and their relevant statistical description are particularly important for understanding English and Chinese TMEs. The linguistic materialization of Actant Ground Path and Motion together with a wealth of tables and figures offers convincing evidence to support the typological classification of English and Chinese. The book's suggestions regarding the Talmyan bipartite typology and Bohnemeyer's MEP contribute to the advancement of TME studies and language typology and help learners to understand motion events and English Chinese typological similarities and differences.

The Conceptual Mind Eric Margolis, Stephen Laurence, 2015-05-08 The study of concepts has advanced dramatically in recent years with exciting new findings and theoretical developments. Core concepts have been investigated in greater depth and new lines of inquiry have blossomed with researchers from an ever broader range of disciplines making important contributions. In this volume leading philosophers and cognitive scientists offer original essays that present the state of the art in the study of concepts. These

essays all commissioned for this book do not merely present the usual surveys and overviews rather they offer the latest work on concepts by a diverse group of theorists as well as discussions of the ideas that should guide research over the next decade

The Routledge Handbook of Translation and Cognition Fabio Alves, Arnt Jakobsen, 2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive state of the art overview of how translation and cognition relate to each other discussing the most important issues in the fledgling sub discipline of Cognitive Translation Studies CTS from foundational to applied aspects With a strong focus on interdisciplinarity the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective Looking at different types of cognitive processes this volume also ventures into emergent areas such as neuroscience artificial intelligence cognitive ergonomics and human computer interaction With an editors introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism second language acquisition and related areas

Traveling Conceptualizations Andrea Hollington, 2015-08-15 Traveling Conceptualizations is a monograph which is concerned with African cultural conceptualizations in Jamaican It contributes to the study of Transatlantic relations between Africa and Jamaica and in particular to the understanding of African influences in Jamaican linguistic practices The book constitutes a first study of these phenomena from a cognitive linguistic perspective and investigates traveling conceptualizations at the intersection of language culture and cognition The author explores Jamaican linguistic practices in different domains namely conceptualizations involving parts of the human body conceptualizations of events roles and relations underlying serial verb constructions and conceptualizations of kinship and names The study can be regarded as an innovative contribution as it looks not only at linguistic expressions on the surface but discusses the underlying cultural and cognitive basis of semantic structures The study thus aims at making African Jamaican connections on the conceptual level visible and also discusses notions of consciousness agency and emblematicity

Encoding Motion Events Till Woerfel, 2018-09-10 Children who grow up as second or third generation immigrants typically acquire and speak the minority language at home and the majority language at school Recurrently these children have been the subject of controversial debates about their linguistic abilities in relation to their educational success However such debates fail to recognise that variation in bilinguals language processing is a phenomenon in its own right that results from the dynamic influence of one language on another This volume provides insight into cross linguistic influence in Turkish German and Turkish French bilingual children and uncovers the nature of variation in L1 and L2 oral motion event descriptions by evaluating the impact of language specific patterns and language dominance The results indicate that next to typological differences between the speakers L1 and L2 language dominance has an impact on the type and direction of influence However the author argues that most variation can be explained by L1 L2

usage preferences Bilinguals make frequent use of patterns that exist in both languages but are unequally preferred by monolingual speakers This finding underlines the importance of usage based approaches in SLA Instruction Grammar Simon Kasper,2015-07-24 Bringing together evidence from natural and social sciences the work introduces the non reductionist Instruction Grammar programme Viewed from within the practicalities of the lifeworld utterances are described as instructions to simulate perceptions and attributions for action The approach provides solutions to long standing philosophical problems of cognitive grammar theories and traditionally puzzling syntactic phenomena Fuzzy Lexical Representations in the Nonnative Mental Lexicon Kira Gor,Denisa Bordag,Anna Chrabaszcz,Svetlana V. Cook,Andreas Opitz,2022-11-07

Caused Accompanied Motion Anna Margetts,Sonja Riesberg,Birgit Hellwig,2022-05-15 This volume investigates the linguistic expression of directed caused accompanied motion events including verbal concepts like BRING and TAKE Contributions explore how speakers conceptualise and describe these events across areally genetically and typologically diverse languages of the Americas Austronesia and Papua The chapters investigate such events on the basis of spoken language corpora of endangered underdescribed languages and in this way the volume showcases the importance of documentary linguistics for linguistic typology The semantic domain of directed caused accompanied motion shows considerable crosslinguistic variation in how meaning components are conflated within single lexemes or distributed across morphemes or clauses The volume presents a typology of common patterns and constraints in the linguistic expression of these events The study of crosslinguistic event encoding provided in this volume contributes to our understanding of the nature extent and limits of linguistic and cognitive diversity

The Bilingual Mind Aneta Pavlenko,2014-02-06 If languages influence the way we think do bilinguals think differently in their respective languages And if languages do not affect thought why do bilinguals often perceive such influence For many years these questions remained unanswered because the research on language and thought had focused solely on the monolingual mind Bilinguals were either excluded from this research as unusual or messy subjects or treated as representative speakers of their first languages Only recently did bi and multilinguals become research participants in their own right Pavlenko considers the socio political circumstances that led to the monolingual status quo and shows how the invisibility of bilingual participants compromised the validity and reliability of findings in the study of language and cognition She then shifts attention to the bilingual turn in the field and examines its contributions to the understanding of the human mind

Pragmatics of Space Andreas H. Jucker,Heiko Hausendorf,2022-09-20 This handbook provides a comprehensive overview of spatial configurations of language use and of language use in space It consists of four parts The first part covers the various practices of describing space through language including spatial references in spoken interaction or in written texts the description of motion events as well as the creation of imaginative spaces in storytelling The second part surveys aspects of the spatial organization of face to face communication including not only spatial arrangements of small groups in interaction but also the spatial dimension of sign

language and gestures The third part is devoted to the communicative resources of constructed spaces and the ways in which these facilitate and shape communication Part four finally is devoted to pragmatics across space and cultures i e the ways in which language use differs across language varieties languages and cultures *Motion Encoding in Language and Space* Mila Dimitrova-Vulchanova, Emile van der Zee, 2013 This book brings together researchers in linguistics computer science psychology and cognitive science to investigate how motion is encoded in language Part I considers the parameters of the field while part II looks at the way in which spatial scale or granularity plays a role in the encoding of motion in language

Concepts in the Brain David Kemmerer, 2019-02-21 For most native speakers of English the meanings of ordinary words like blue cup stumble and carve seem quite natural and self evident It turns out however that they are far from universal as shown by recent research in the discipline known as semantic typology To be sure the roughly 6 500 languages around the world do have many similarities in the sorts of concepts they encode But they also vary greatly in numerous ways such as how they partition particular conceptual domains how they map those domains onto syntactic categories which distinctions they force speakers to habitually attend to and how deeply they weave certain notions into the fabric of their grammar Although these insights from semantic typology have had a major impact on the field of psycholinguistics they have been mostly neglected by the branch of cognitive neuroscience that studies how concepts are represented organized and processed in our brains In *Concepts in the Brain* David Kemmerer exposes this oversight and demonstrates its significance He argues that as research on the neural substrates of semantic knowledge moves forward it should to the extent possible expand its purview to embrace the broad spectrum of cross linguistic variation in the lexical and grammatical representation of meaning Otherwise it will never be able to achieve a truly comprehensive pan human account of the cortical underpinnings of concepts Richly illustrated and written in an accessible interdisciplinary style the book begins by elaborating the different perspectives on concepts that currently exist in the parallel fields of semantic typology and cognitive neuroscience It then shows how a synthesis of these approaches can lead to a more unified and inclusive understanding of several domains of concrete meaning specifically objects actions and spatial relations Finally it explores a number of intriguing and controversial issues involving the interplay between language cognition and consciousness **Thinking and Speaking in**

Two Languages Aneta Pavlenko, 2011-01-01 Dan I Slobin University of California Berkeley USA *Motion and Space across Languages* Iraide Ibarretxe-Antuñano, 2017-08-15 This volume offers a unique combination of interdisciplinary research and a comprehensive overview of motion and space studies from a semantic typological perspective The chapters present cutting edge research covering central topics such as the status of semantic components in motion event descriptions and their role in typological variation the function of linguistic multimodal structures for the codification of motion the diachronic evolution of motion expressions and its effects on motion typologies the correspondences between physical and non physical fictive metaphorical motion and the impact of contexts and genres on the characterization and

interpretation of motion events These issues are examined from a theoretical and applied linguistic perspective L1 L2 acquisition translation interpreting The analyses make use of diachronic and synchronic data collected by a range of methods elicitation experimentation and corpus research in more than fifteen languages All in all this book will be of great value to scholars and students interested in the expression of motion and space across languages Sources of Variation in First Language Acquisition Maya Hickmann,Edy Veneziano,Harriet Jisa,2018-02-22 Developmental research has long focused on regularities in language acquisition minimizing factors that might be responsible for variation Although researchers are now increasingly concerned with one or another of these factors this volume brings together research on three different sources of variation language specific properties the nature of the input to children across contexts and several aspects of the learners themselves Chapters explore these sources of variation within an interdisciplinary and comparative approach allying theories and methodologies stemming from linguistics psycholinguistics developmental psychology and neuroscience The comparative perspective involves different languages contexts of use types of learners first second language acquisition monolingual bilingual learners autism language impairment as well as vocal and visuo gestural communicative modalities co verbal gestures sign language acquisition The volume points to the need to enhance interdisciplinary research using complementary methodologies to further examine sources of variation and to integrate variation into a more general developmental theory **Multimodality across Epistemologies in Second Language Research** Amanda Brown,Søren W. Eskildsen,2024-04-01 This collection highlights diverse epistemological perspectives in original research on the important role of multimodality in second language contexts The volume explores a wide range of theoretical and methodological traditions toward foregrounding the notion that bodily action is not merely an add on to the modality of talk but an integral part of second language teaching learning and interaction Following an introductory chapter 18 empirical chapters feature either classroom or non classroom research which shed light on different dimensions of multimodality in second language contexts including learning reflected in gesture learning gesture across languages the role of bodily action in language teaching and the role of movement in configuring space for effective communication Each empirical chapter follows a consistent structure detailing the research focus the background to each study methodology and findings A concluding synthesis chapter braids the insights of these chapters drawing parallels across different methods and pointing toward crosscutting areas for future research This book will be of interest to students and scholars in applied linguistics multilingualism bilingualism gesture studies cognitive science and psychology Chapters 10 and 11 of this book are available for free in PDF format as Open Access at www.taylorfrancis.com They have been made available under a Creative Commons Attribution NonCommercial ShareAlike CC BY NC SA 4.0 International license *Ten Lectures on the Representation of Events in Language, Perception, Memory, and Action Control* Jeffrey M. Zacks,2020-02-10 The representation of events is a central topic for cognitive science In this series of lectures Jeffrey M Zacks situates event representations and their role in

language within a theory of perception and memory Event representations have a distinctive structure and format that result from computational and neural mechanisms operating during perception and language comprehension A crucial aspect of the mechanisms is that event representations are updated to optimize their predictive utility This updating has consequences for action control and for long term memory Event cognition changes across the adult lifespan and can be impaired by conditions including Alzheimer s disease These mechanisms have broad impact on everyday activity and have shaped the development of media such as cinema and narrative fiction

Communicative Efficiency Natalia Levshina, 2022-11-17 Illustrated with rich examples this book shows how language users can save effort by choosing efficient structures and word order

Unveiling the Magic of Words: A Review of "**Event Representation In Language And Cognition**"

In a global defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their capability to kindle emotions, provoke contemplation, and ignite transformative change is truly awe-inspiring. Enter the realm of "**Event Representation In Language And Cognition**," a mesmerizing literary masterpiece penned by a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve to the book is central themes, examine its distinctive writing style, and assess its profound effect on the souls of its readers.

Event Representation In Language And Cognition Introduction

In the digital age, access to information has become easier than ever before. The ability to download Event Representation In Language And Cognition has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Event Representation In Language And Cognition has opened up a world of possibilities. Downloading Event Representation In Language And Cognition provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Event Representation In Language And Cognition has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Event Representation In Language And Cognition. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Event Representation In Language And Cognition. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Event Representation In Language And Cognition, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal

information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Event Representation In Language And Cognition has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Event Representation In Language And Cognition Books

1. Where can I buy Event Representation In Language And Cognition books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Event Representation In Language And Cognition book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Event Representation In Language And Cognition books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Event Representation In Language And Cognition audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google

Play Books offer a wide selection of audiobooks.

8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Event Representation In Language And Cognition books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
