EDUCATION Leadership Approaches to Greek Poetry Marco Ercoles, Lara Pagani, Filippomaria Pontani, Giuseppe Ucciardello, 2019-01-14 In the last decades the field of research on ancient Greek scholarship has been the object of a remarkable surge of interest with the publication of handbooks reference works and new editions of texts This partly unexpected revival is very promising and it continues to enhance and modify both our knowledge of ancient scholarship and

the way in which we are accustomed to discuss these texts and tackle the editorial and exegetical challenges they pose This volume deals with some pivotal aspects of this topic being the outcome of a three year project funded by the Italian Ministry for Education University and Research MIUR on specific aspects of the critical re appraisal of Homer Hesiod Pindar and Aeschylus in Greek culture throughout antiquity and the Middle Ages It tackles issues such as the material form of the transmission of the exegesis from papyri to codices the examination of hitherto unexplored branches of the manuscript evidence the discussion of some important scholia and the role played by the indirect tradition and the assimilation of the exegetical heritage in grammatical and lexicographical works Some strands of the ancient and medieval scholarship are here re evaluated afresh by adopting an interdisciplinary methodology which blends modern editorial techniques developed for problematic or non authorial medieval texts with current trends in the history of philology and literary criticism In their diversity of subject matter and approach the papers collected in the volume give intended readers an excellent overview of the topics of the project

The Sense of Power Carl Berger,2013-01-01 Prior to the publication of The Sense of Power most studies of the Canadian movement for imperial unity focused on commercial policy and military and naval cooperation This influential book demonstrated that the movement which held that Canada could only become a great nation within the British Empire was significantly influenced by its leading advocates belief in nationalism Carl Berger explores the emotional appeal and intellectual context of this belief arguing that these advocates support of imperial unity can be grasped only in terms of their commitment to certain conservative values and in relation to their conception of Canada The Sense of Power was commended by the Toronto Star when it was first published as entertaining as well as brilliant and in 2011 Ramsay Cook noted that few first books or for that matter few books have made as marked an impact on the interpretation of a major theme in Canadian history This second edition brings to life the work s incisive analysis and its important contribution to Canadian intellectual history

The Ecologies of the Building Envelope Alejandro Zaera-Polo, Jeffrey Anderson, 2021-05-11 The Ecologies of the Envelope theorizes the building envelope as a literal embodiment of the social political technological and economic contingencies which have become embedded within it over the last century analyzing the historical lineages heroes and villains that helped define the complex material ecologies we see within the envelope today While the facade is one of the most thoroughly theorized elements of architecture it is also one of the most questioned since the end of the 19th century Within the discipline of architecture the traditional understanding of the facade focuses primarily on semiotic and compositional operations such as proportional laws and linguistic codes which are deployed on the building's surface In contrast to this our material and environmental theory of the envelope proposes that the exponential development of building technologies since the mid 19th century coupled with new techniques of management and regulation have diminished the compositional and ornamental capacities of the envelope in favor of material quantitative and technical performances Rather than producing a stylistic analysis of the facade we investigate the historical lineages of the performances components assembly types and material entanglements that constitute the contemporary building envelope
