Revolutions in the Western World 1775-1825 Jeremy Black, 2017-07-12 Considering what has been described as an Age of Revolutions Black assesses a formative period in world history by examining the North American European Haitian and Latin American Revolutions Causes courses and consequences are all clarified in the articles selected and an introduction charts the major themes Dynamic Transcendentals Alice Ramos, 2012-05-07 Addressing contemporary interest in the

relationship between metaphysics and ethics as well as the significance of beauty for ethics Alice Ramos presents an accessible study of the transcendentals and provides a dynamic rather than static view of truth goodness and beauty The Scandal of a Divine Messiah Brian J. Crawford, 2024-12-30 In this groundbreaking book Brian J Crawford navigates the complex intellectual landscape that has traditionally separated Jews and Christians His focus is on a scandalous claim God became a man as Jesus of Nazareth Since the Middle Ages Jewish philosophers have said such an idea is impossible and absurd and Jewish mystics have said the idea is redundant for all things are inhabited by divine sparks By critically examining the philosophical underpinnings of the Maimonidean and Kabbalistic thought that has shaped Jewish theology Crawford constructs a compelling case for the incarnation that is grounded in the Hebrew Scriptures consistent with history informed by science and illuminated by philosophical inquiry Included within is a deep interaction with Maimonides s Guide to the Perplexed the Jewish mystical tradition historical Christian orthodoxy and Messianic Jewish theology This landmark study promises to reinvigorate Jewish Christian discourse on the nature of God the Jewishness of the Trinity and the incarnation and the role of philosophy in Judaism and Christianity Our Human Herds Stephen Martin Fritz, 2020-09-04

Our Human Herds presents a new theory in moral and political philosophy called dual morality The theory proposes that just as the physical senses of sight smell taste touch and hearing evolved to help us navigate our physical environment two independent moral senses evolved to guide us to success in our social world One prioritizes cooperation the other competition The first bases moral justification on the egalitarianism that emphasizes our equal worth the other finds moral justification in the inequalities that allow us to distinguish better from worse Liberal and conservative are merely the names given to the political manifestations of these two forms of moral expression just as socialist and capitalist describe their economic manifestations and personality and character their psychological ones Our Human Herds addresses what it means to be a human being why we fight about the things that divide us and why we unite behind the ideas that draw us together

The book examines all aspects of human social behavior revealing how and why we often disagree in our approaches to education history war crime pleasure happiness politics science and religion This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its pages fly by Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Reviews Book Review A vast philosophical study charts the shifting moral landscape while tackling the weightiest question of human existence what is the meaning of life Humanity s moral framework remains in a constant state of reconstruction As the author points out in his opening chapter Two hundred years ago if a woman was raped and became pregnant we d kill the rapist and spare the baby Today we spare rapist and kill the baby Centuries ago many cultures condoned polygamy today we put people in jail for it Over the course of this weighty tome which is just shy of 1 000 pages the author ponders what morality is with an emphasis on humans as grouping or herding creatures and the causes of its flux and reflux Furthermore there is an attempt to reconcile opposing philosophical theories by introducing a new conceptual model called Dual Morality proposed as an all encompassing blueprint of human morality The study is logically structured divided into four sections The Theory of Dual Moralism The Explanation including investigations of the group and the self The Derivations which considers family country religion and science nature technology and finally The Extrapolations a far reaching look at everything from pleasure and happiness to suicide murder and abortion The author possesses the rare skill of being able to explore himself with an enviable ease drawing on palatable references to popular culture For example Comedian Woody Allen said he laughs at his own jokes when they first come to him because humor originates in the unconscious When his conscious mind hears them for the first time it is as if they came from another place and so we are in a way an audience to our own humor This approach applied throughout makes complex ideas not only accessible but entertaining and enjoyable as well The result is far from the predictable dry academic thesis This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its 951 pages fly by Fritz s dedication is to that miniscule fragment of humanity who read books like this Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Indie Kirkus Media LLC 6411 Burleson Rd Austin TX 78744 indie kirkusreviews **Global Criminal and**

Sovereign Free Economies and the Demise of the Western Democracies Robert J. Bunker, Pamela Ligouri
Bunker, 2014-09-15 Much has been written about the many economic benefits of globalization and the triumph and spread of democratic liberalism with the end of the Cold War following the demise of the Soviet Union This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith based views on the moral purity of a globalized marketplace It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy IPE a discipline that focuses on the formal and legitimate economies and the fa ade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state centric

system Having highlighted these concerns this book looks at two major themes The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally one in which the Western liberal democracies and its citizens are ill prepared to respond because it exists at the trans civilization level bridging the modern to the post modern world The second theme focuses on the actual process of state deconstruction that is taking place This process is leading to what may become the very undoing of the democracies Drawing together experts from a variety of backgrounds this work explores the increasing shift away from formal based capitalism and evaluates through case studies how different states are responding to the challenges they face This work will be of great interest to students and scholars of international political economy

Energy, Complexity and Wealth Maximization Robert Ayres, 2016-07-14 This book is about the mechanisms of wealth creation or what we like to think of as evolutionary progress The massive circular flow of goods and services between producers and consumers is not a perpetual motion machine it has been dependent for the past 150 years on energy inputs from a finite storage of fossil fuels In this book you will learn about the three key requirements for wealth creation and how this process acts according to physical laws and usually after some part of the natural wealth of the planet has been exploited in an episode of creative destruction Knowledge and natural capital particularly energy will interact to power the human wealth engine in the future as it has in the past Will it sputter or continue along the path of evolutionary progress that we have come to expect Can the new immaterial wealth of information and ideas which makes up the so called knowledge economy replace depleted natural wealth These questions have no simple answers but this masterful book will help you to understand the grand challenge of our time Praise for Energy Complexity and Wealth Maximization people who run the modern world politicians economists and lawyers have a very poor grasp of how it really works because they do not understand the fundamentals of energy exergy and entropy those decision makers would greatly benefit from reading this book Vaclav Smil Distinguished Professor Emeritus University of Manitoba A grandiose design impressive worth reading and reflecting Prof Dr Ernst Ulrich von Weizsäcker Founder of Wuppertal Institute Co President of the Club of Rome Former Member of the German Bundestag co chair of the UN's Resource Panel The book is a must read for concerned citizens and decision makers across the globe RK Pachauri Founder and Executive Vice Chairman The Energy and Resources Institute TERI and ex chair International Panel on Climate Change IPCC

Maps of Meaning Jordan B. Peterson, 2002-09-11 Why have people from different cultures and eras formulated myths and stories with similar structures What does this similarity tell us about the mind morality and structure of the world itself From the author of 12 Rules for Life An Antidote to Chaos comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals myths and religious stories have long narrated A cutting edge work that brings together neuropsychology cognitive science and Freudian and Jungian approaches to mythology and narrative Maps of Meaning presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind

The Inklings, the Victorians, and

the Moderns Christopher Butynskyi, 2020-01-28 In *The Inklings the Victorians and the Moderns* the author examines the dynamics of a small group of twentieth century traditionalists who reacted in opposition to the spirit of the intellectual movements of the modern age In particular he draws on the Inklings e g C S Lewis J R R Tolkien Christian humanists such as G K Chesterton and other proponents of the Great Books and classical liberal learning to outline a position that eschewed reactionary rejections of modern thought but sought to transcend its perceived limitations by asserting the continued value of myth religion liberal education and ancient texts They were more than instigators and wished to reconcile and translate conservative traditional ideas within a progressive modern scientific context The author magnifies the intellectual trends in modern Western thought in the twentieth century and provides the historical context for the resistance to the prominent and convincing tenets of modernity Given the myriad responses he focuses on a more conservative response to reductive definitions born out of well intentioned progressivism The author approaches the subject matter from an historical perspective but utilizes an interdisciplinary discourse to create a multi dimensional explanation of the intellectual atmosphere of the twentieth century

Frames Of Justice Leroy H. Pelton, This work is devoted to analyzing three major frames of justice group justice individual desert and life affirmation and their implications for social policy as well as their reflections in contemporary social policies Pelton finds that all three frames of justice are reflected in the Bible and later the Koran He contends that there is no evidence in the Bible of a genesis or development from one frame of justice to another Rather a sense of justice has existed in the human mind from time immemorial with the three frames coexisting and manifesting themselves in both inter and intra group relations The prominence of one frame over another at any particular point in history or in a particular geographical location is influenced by a variety of factors though it is ultimately open to human choice Pelton compares and contrasts the philosophies of nonviolence and liberalism in regard to the frames and explores the relationships between principle sentiment reason justice and policy He discusses social science's problematic relationship to justice in policymaking for instance how scholars have focused more on the effectiveness of policies largely in terms of statistical outcomes reflecting aggregate data analyses than on their justice He goes on to explore in depth how frames of justice give direction to social policies including those of genocide *Frames of Justice* is an outstanding work that analyzes the question of justice and social policy while simultaneously exploring the notion of desert in religion philosophy and legislation especially within the context of the moral question of the relationship between means and ends and contrasting it with the principle of life affirmation Leroy H Pelton is a professor in and former director of the School of

Social Work University of Nevada Las Vegas and professor emeritus of the School of Social Work Salem State College Massachusetts He is the author of *The Psychology of Nonviolence For Reasons of Poverty A Critical Analysis of the Public Child Welfare System in the United States* and *Doing Justice Liberalism Group Constructs and Individual Realities* and the editor of *The Social Context of Child Abuse and Neglect* He has also written numerous journal articles on psychology social work child welfare and social policy

Integrating Psychology and Spirituality? Richard L. Gorsuch, 2002-12-30 Gorsuch seeks to provide a thoughtful introduction to relating spirituality and psychology in a postmodern era This is timely due to the considerable interest in spirituality the ways psychology and religion can impact lives and ways spirituality and psychology can be brought together in dialogue or integration Gorsuch provides a basis from which to address the many practical concerns to which both psychology and spirituality speak Practical issues are the ultimate concern of both psychology and spirituality Gorsuch addresses such issues as examples along the way and in the final set of chapters which introduce and discuss issues central to clinical psychology and those central to social psychology Psychology provides an empirical base for many of his discussions and he devises two methods of dialoging or integrating psychology and spirituality Of particular interest to psychologists and providers of mental health services and to those involved with the intersection of science and religion

God and Man in the Law Robert Lowry Clinton, 1997 In a wide ranging study based on legal history political theory and philosophical ideas going all the way back to Plato and Roman law Robert Clinton challenges current faith in an activist judiciary Claiming that a human centered Constitution leads to government by reductive moral theory and illegitimate judicial review he advocates a return to traditional jurisprudence and a God centered Constitution grounded in English common law and its precedents

Motives for Metaphor in Scientific and Technical Communication Timothy Giles, Charles Sides, 2017-03-02 Examination of the work of scientific icons Newton Descartes and others reveals the metaphors and analogies that directed their research and explain their discoveries Today scientists tend to balk at the idea of their writing as rhetorical much less metaphorical How did this schism over metaphor occur in the scientific community To establish that scientists should use metaphors to explain

science to the public and need to be conscious of how metaphor can be useful to their research this book examines the controversy over cloning and the lack of a metaphor to explain it to a public fearful of science's power The disjunction between metaphor and science is traced to the dispensation of the Solar System Analogy in favor of a mathematical model Arguing that mathematics is metaphorical the author supports the idea of all language as metaphorical unlike many rhetoricians and philosophers of science who have proclaimed all language as metaphorical but have allowed a distinction between a metaphorical use of language and a literal use For technical communication pedagogy the implications of this study suggest foregrounding metaphor in textbooks and in the classroom Though many technical communication textbooks recommend metaphor as a rhetorical strategy some advise avoiding it and those that recommend it usually do so in a paragraph or two with little direction for students on how to recognize metaphors or to how use them This book provides the impetus for a change in the pedagogical approach to metaphor as a rhetorical tool with epistemological significance
