Ubiquitous Computing Fundamentals John Krumm, 2018-10-08 a must read text that provides a historical lens to see how ubicomp has matured into a multidisciplinary endeavor It will be an essential reference to researchers and those who want to learn more about this evolving field From the Foreword Professor Gregory D Abowd Georgia Institute of Technology First introduced two decades ago the term ubiquitous computing is now part of the common vernacular Ubicomp as it is commonly called has grown not just quickly but broadly so as to encompass a wealth of concepts and technology that serves any number of purposes across all of human endeavor While such growth is positive the newest generation of ubicomp practitioners and researchers isolated to specific tasks are in danger of losing their sense of history and the broader perspective that has been so essential to the field s creativity and brilliance Under the guidance of John Krumm an original ubicomp pioneer Ubiquitous Computing Fundamentals brings together eleven ubiquitous computing trailblazers who each report on his or her area of expertise Starting with a historical introduction the book moves on to summarize a number of self contained topics Taking a decidedly human perspective the book includes discussion on how to observe people in their natural environments and

evaluate the critical points where ubiquitous computing technologies can improve their lives Among a range of topics this book examines How to build an infrastructure that supports ubiquitous computing applications Privacy protection in systems that connect personal devices and personal information Moving from the graphical to the ubiquitous computing user interface Techniques that are revolutionizing the way we determine a person's location and understand other sensor measurements While we needn't become expert in every sub discipline of ubicomp it is necessary that we appreciate all the perspectives that make up the field and understand how our work can influence and be influenced by those perspectives This is important if we are to encourage future generations to be as successfully innovative as the field's originators **Teacher**

Willingness to Enroll in Future Web-Based Courses While Controlling for Student Characteristics Veronica A.

Thurmond, 2003 Pub_AbstractText The impetus for this study was the need to gain a better understanding of what interaction activities in the virtual classroom affect student outcomes The purpose was to determine which perceptions of interactions contributed to predicting student outcomes of satisfaction and future enrollment in Web based courses while controlling for student characteristics The problem is that the interaction that occurs in the Web based classroom is markedly different than what occurs in the traditional classroom setting The study was a secondary analysis using data from 388 student evaluations of Web based courses Using Astin's Input Environment Outcome I E O conceptual framework influences of student characteristics inputs and virtual classroom interactions environment on student outcomes were examined Student input predictors were perceptions of computer skills knowledge of electronic communications number of Web based courses taken distance living from campus and age Environmental predictors included interactions with the instructor students technology and perceptions of presence Building Academic Leadership Capacity Walter H. Gmelch, Jeffrey L. Buller, 2015-01-08 A

clear systematic road map to effective campus leadership development Building Academic Leadership Capacity gives

institutions the knowledge they need to invest in the next generation of academic leaders With a clear generalizable systematic approach this book provides insight into the elements of successful academic leadership and the training that makes it effective Readers will explore original research that facilitates systematic continuous program development augmented by the authors own insight drawn from experience establishing such programs Numerous examples of current campus programs illustrate the concepts in action and reflection questions lead readers to assess how they can apply these concepts to their own programs The academic leader is the least studied and most misunderstood management position in America Demands for accountability and the complexities of higher education leadership are increasing and institutions need ways to shape leaders at the department chair dean and executive levels of all functions and responsibilities This book provides a road map to an effective development program whether the goal is to revamp an existing program or build one from the ground up Readers will learn to Develop campus leadership programs in a more systematic manner Examine approaches that have been proven effective at other institutions Consider how these approaches could be applied to your institution Give leaders the skills they need to overcome any challenge The field of higher education offers limited opportunity to develop leaders so institutions must invest in and grow campus leaders themselves All development programs are not created equal so it s important to have the most effective methods in place from day one For the institution seeking a better way to invest in the next generation of campus leaders Building Academic Leadership Capacity is a valuable resource
