physical mental and social well being and not merely the absence of disease Health was a triangle and I had been guilty of virtually ignoring two sides of that triangle As I became involved in practical nutrition education initiatives the deficiencies of an approach based on giving information about nutrition and physical health became more and more apparent The children whom I saw in schools knew exactly what to say when asked to describe a nutritious diet they could recite the food guide and list rich sources of vitamins and minerals but none of this intellectual knowledge was reflected in their own actual eating habits
