Energy Research Abstracts, 1984      **America and the Cold War, 1941-1991** Norman A. Graebner, Richard Dean Burns, Joseph M. Siracusa, 2010-05-05 Three distinguished diplomatic historians offer an assessment of the Cold War in the realist tradition that focuses on balancing the objectives of foreign policy with the means of accomplishing them America and the Cold War 1941 1991 A Realist Interpretation is a sweeping historical account that focuses on the policy differences at the center of this conflict In its pages three preeminent authors offer an examination of contemporary criticism of the Cold War documenting the views of observers who appreciated that many policies of the period were not only dangerous but could not resolve the problems they contemplated The study offers a comprehensive chronicle of U S Soviet relations broadly conceived from World War II to the collapse of the Soviet Union It places the origins of the Cold War as related to the contentious issues of World War II and stresses the failure of Washington to understand or seriously seek settlement of those issues It points out how nuclear weaponry gradually assumed political stature and came to dominate high level Soviet American diplomatic activity at the same time discounting the notion that the Cold War was a global ideological confrontation for the future of civilization A concluding chapter draws lessons from the Cold War decades showing how they apply to dealing with nation states and terrorist groups today      **Film and the Nuclear Age** Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography choronology Illustrated      **Effects of Human Exposure to Ionizing Radiation** A. **Nagasaki** Chad Diehl, 2018-03-15 In *Resurrecting Nagasaki* Chad R Diehl explores the genesis of narratives surrounding the atomic bombing of August 9 1945 by following the individuals and groups who contributed to the shaping of Nagasaki City's postwar identity Municipal officials survivor activist groups the Catholic community and American occupation officials all interpreted the destruction and reconstruction of the city from different sometimes disparate perspectives Diehl's analysis reveals how these atomic narratives shaped both the way Nagasaki rebuilt and the ways in which popular discourse on the atomic bombings framed the city's experience for decades

**Supreme emergency** Andrew Corbett,2022-02-15 In Supreme emergency an ex Trident submarine captain considers the evolution of UK nuclear deterrence policy and the implications of a previously unacknowledged aversion to military strategies that threaten civilian casualties Drawing on extensive archival research the book provides a unique synthesis of the factors affecting British nuclear policy decision making and draws parallels between government debates about reprisals for First World War zeppelin raids on London the strategic bombing raids of the Second World War and the evolution of the UK nuclear deterrent It concludes that among all the technical factors an aversion to being seen to condone civilian casualties has inhibited government engagement with the public on deterrence strategy since 1915     *The Dragon's Tail* Robert A. Jacobs,2010 When President Harry Truman introduced the atomic bomb to the world in 1945 he described it as a God given harnessing of the basic power of the universe Six days later a New York Times editorial framed the dilemma of the new Atomic Age for its readers Here the long pilgrimage of man on Earth turns towards darkness or towards light American nuclear scientists aware of the dangers their work involved referred to one of their most critical experiments as tickling the dragon s tail Even after Hiroshima and Nagasaki most Americans may not have been sure what an atomic bomb was or how it worked But they did sense that it had fundamentally changed the future of the human race In this book Robert Jacobs analyzes the early impact of nuclear weapons on American culture and society He does so by examining a broad range of stories or nuclear narratives that sought to come to grips with the implications of the bomb s unprecedented and almost unimaginable power Beginning with what he calls the primary nuclear narrative which depicted atomic power as a critical agent of social change that would either destroy the world or transform it for the better Jacobs explores a variety of common themes and images related to the destructive power of the bomb the effects of radiation and ways of surviving nuclear war He looks at civil defense pamphlets magazines novels and films to recover the stories the U S government told its citizens and soldiers as well as those presented in popular culture According to Jacobs this early period of Cold War nuclear culture from 1945 to the banning of above ground testing in 1963 was distinctive for two reasons not only did atmospheric testing make Americans keenly aware of the presence of nuclear weapons in their lives but radioactive fallout from the tests also made these weapons a serious threat to public health separate from yet directly linked to the danger of nuclear war

*Guide to Federal Records in the National Archives of the United States: Record groups 1-170* United States. National Archives and Records Administration,1995     **By the Bomb's Early Light** Paul Boyer,2005-10-21 Originally published in 1985 By the Bomb s Early Light is the first book to explore the cultural fallout in America during the early years of the atomic age Paul Boyer argues that the major aspects of the long running debates about nuclear armament and disarmament developed and took shape soon after the bombing of Hiroshima The book is based on a wide range of sources including cartoons opinion polls radio programs movies literature song lyrics slang and interviews with leading opinion makers of the time Through these materials Boyer shows the surprising and profoundly disturbing ways in which the bomb quickly and

totally penetrated the fabric of American life from the chillingly prophetic forecasts of observers like Lewis Mumford to the Hollywood starlet who launched her career as the anatomic bomb In a new preface Boyer discusses recent changes in nuclear politics and attitudes toward the nuclear age      **The Challenge of Epidemiology** Carol Buck,1988
