Women, Sport, Society Roberta Park,Patricia Vertinsky,2013-09-13 During the last four decades women's and gender

history have become vibrant fields including studies of attitudes regarding the limited physical and other abilities of females as well as studies of the accomplishments of notable female athletes. We have become increasingly aware that women have made contributions to physical education, dance and sport that go far beyond being teachers, athletes and coaches. They have created and implemented an astonishing variety of programs intended to serve the needs of large numbers of children and youth, sometimes organizing student health services as well as chairing departments of physical education. They have worked as directors of sport, physical education and dance, running playgrounds and recreational facilities and have created and or served as important officers of a variety of sporting organizations. This book explores the contributions and achievements of women in a variety of historical and geographical contexts which not surprisingly opens opportunities for additions, revisions and counter narratives to accepted histories of physical education and sport science. It seeks to broaden our understandings about the backgrounds, motivations and achievements of dedicated women working to improve health and bodily practices in a variety of different arenas and for often different purposes. This book was previously published as a special issue of the *International Journal of the History of Sport*.

French Cycling Hugh Dauncey, 2012-01-01 French Cycling a Social and Cultural History aims to provide a balanced and detailed analytical survey of the complex leisure activity, sport and industry that is cycling in France. Identifying key events, practices, stakeholders and institutions in the history of French cycling, the volume presents an interdisciplinary analysis of how cycling has been significant in French society and culture since the late Nineteenth century. Cycling as Leisure is considered through reference to the adoption of the bicycle as an instrument of tourism and emancipation by women in the 1880s, for example, or by study of the development in the 1990s of long distance tourist cycle routes. Cycling as Sport and its attendant dimensions of amateurism, professionalism, national identity, the body and doping and other issues is investigated through study of the history of the Tour de France, the track racing organised at the Velodrome d'hiver in Paris in the 1920s and 1930s and other emblematic events. Cycling as Industry and economic activity is considered through an assessment of how cycling firms have contributed to technological innovation at various junctures in France's economic development. Cycling and the Media is investigated through analysis of how cycle sport has contributed to developments in the French press in early decades but also to new trends in television and radio coverage of sports events. Based on a very wide range of primary and secondary sources, the volume aims to present in clear language an explanation of the varied significance of cycling in France over the last hundred years.
