

# Rock Weathering and Interpretation of Sediments Exercises

## PRE-LAB EXERCISES

1. For each of the following sedimentary rock descriptions, interpret these five paleoenvironmental factors:

- **source area lithology** (rock type from which it was derived),
- **paleoclimate** (humid, arid, etc.),
- **tectonic activity** (high or low tectonic activity),
- **energy levels** (high or low, consistent or inconsistent energy levels),
- **time in the depositional environment** (long or short).

| Sedimentary Rock Descriptions                                         | Paleoenvironmental Factors |              |                   |               |      |
|-----------------------------------------------------------------------|----------------------------|--------------|-------------------|---------------|------|
|                                                                       | Source Area Lithology      | Paleoclimate | Tectonic Activity | Energy Levels | Time |
| Quartz sandstone that is well-sorted and well-rounded                 |                            |              |                   |               |      |
| Arkose that is poorly sorted and poorly rounded                       |                            |              |                   |               |      |
| Quartz sandstone that is angular, muddy, and poorly sorted            |                            |              |                   |               |      |
| Arkose that is well-sorted and well-rounded                           |                            |              |                   |               |      |
| Litharenite that is poorly sorted, has no mud, and has angular grains |                            |              |                   |               |      |
