Common Core Dilemma Who Owns Our Schools? Mercedes K. Schneider, 2015-06-15 Nothing provided

Building the Population Bomb Emily Klancher Merchant, 2021-04-21 Across the twentieth century Earth's human population increased undeniably quickly rising from 1.6 billion people in 1900 to 6.1 billion in 2000. As population grew it also began to take the blame for some of the world's most serious problems from global poverty to environmental degradation and became an object of intervention for governments and nongovernmental organizations. But the links between population, poverty, and pollution were neither obvious nor uncontested. *Building the Population Bomb* tells the story of the twentieth century population crisis by examining how scientists, philanthropists, and governments across the globe came to define the rise of the world's human numbers as a problem. It narrates the history of demography and population control in the twentieth century, examining alliances and rivalries between natural scientists concerned about the depletion of the world's natural resources, social scientists concerned about a bifurcated global economy, philanthropists aiming to preserve American political and economic hegemony, and heads of state in the Global South seeking rapid economic development. It explains how these groups forged a consensus that promoted fertility limitation at the expense of women, people of color, the world's poor, and the Earth itself. As the world's population continues to grow with the United Nations projecting 11 billion people by the year 2100, *Building the Population Bomb* steps back from the conventional population debate to demonstrate that our anxieties about future population growth are not obvious but learned. Ultimately, this critical volume shows how population growth itself is not a barrier to economic, environmental, or reproductive justice; rather, it is our anxiety over population growth that distracts us from the pursuit of these urgent goals.

Domestication Gone Wild Heather Anne Swanson, Marianne Elisabeth Lien, Gro B. Ween, 2018-09-27 The domestication of plants and animals is central to the familiar and now outdated story of civilization's emergence Intertwined with colonialism and imperial expansion the domestication narrative has informed and justified dominant and often destructive practices Contending that domestication retains considerable value as an analytical tool the contributors to *Domestication Gone Wild* reengage the concept by highlighting sites and forms of domestication occurring in

unexpected and marginal sites from Norwegian fjords and Philippine villages to British falconry cages and South African colonial townships Challenging idioms of animal husbandry as human mastery and progress the contributors push beyond the boundaries of farms fences and cages to explore how situated relations with animals and plants are linked to the politics of human difference and conversely how politics are intertwined with plant and animal life Ultimately this volume promotes a novel decolonizing concept of domestication that radically revises its Euro and anthropocentric narrative Contributors Inger Anneberg Natasha Fijn Rune Flikke Frida Hastrup Marianne Elisabeth Lien Knut G Nustad Sara Asu Schroer Heather Anne Swanson Anna Lowenhaupt Tsing Mette Vaarst Gro B Ween Jon Henrik Ziegler Remme *The City Record* New York (N.Y.),1902 **Arts & Humanities Citation Index** ,1975 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals
