History Essay Grade 12014:

Material Theories Elena Chestnova, 2022-06-19 *Material Theories* takes a radically new approach to well established thinking on nineteenth century architecture and design by investigating Gottfried Semper's classic ideas about dressing, metamorphosis of material and cultural development culminating in his two volume publication *Style*. This book demonstrates how Semper's theories crystallised among his encounters with material things of the late 1840s and early 1850s. It examines several discursive frameworks and phenomena which shaped the attitude to artefacts in Europe in the mid nineteenth century and which were specifically pertinent to Semper's evolution: archaeology and antiquarianism, the domestic interior, print media collections and the embodied relationship between the designer and their work. For the first time this book examines the construction of a design theory not only as an intellectual endeavour but also as a process of confrontation with material things. It employs recent approaches to material culture in particular Thing Theory in order to show that Semper's artefact references constituted his ideas rather than simply giving impetus to them. It will be an important investigation for academics and researchers interested in interior design history as well as scholars of material culture and history of design theory.

Debating Modern Medical Technologies Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions: Are they safe and effective? Are they worth the cost? When should they be allowed on the market and when should Medicare, Medicaid and private insurance companies be required to pay for drugs, devices and diagnostic tests? Using case studies of disputes about the value of mammography, screening genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell based therapies and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians and patient advocates. *Debating Modern Medical Technologies: The Politics of Safety, Effectiveness and Patient Access* reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine and technology assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients.

Managing Madness Erika Dyck, Alex Deighton, 2017-09-22 The Saskatchewan Mental Hospital at Weyburn has played a significant role in the history of psychiatric services, mental health research and providing care in the community. Its history provides a window to the changing nature of mental health services over the 20th century. Built in 1921, Saskatchewan Mental Hospital was considered the last asylum in North America and the largest facility of its kind in the British Commonwealth. A decade later the Canadian Committee for Mental Hygiene cited it as one of the worst

facilities in the country largely due to extreme overcrowding In the 1950s the Saskatchewan Mental Hospital again attracted international attention for engaging in controversial therapeutic interventions including treatments using LSD In the 1960s sweeping healthcare reforms took hold in the province and mental health institutions underwent dramatic changes as they began transferring patients into communities As the patient and staff population shrunk the once palatial building fell into disrepair the asylum's expansive farmland went out of cultivation and mental health services folded into a complicated web of social and correctional services Erika Dyck's *Managing Madness* examines an institution that housed people we struggle to understand help or even try to change
