Citation Analysis and Dynamics of Citation Networks Michael Golosovsky, 2019-09-26 This book deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences

including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics

Decision Making and Problem Solving in Organizations: Assessing and Expanding the Carnegie Perspective Daniella Laureiro Martinez, Pino Audia, Daniel A. Newark, 2024-09-04. Within the broader study of decision making, the Carnegie perspective occupies a unique place. Initially developed by pioneering scholars such as Herbert Simon and James March, it views organizational decisions as resulting from the combined influences of psychological processes of attention allocation, interpretation of experience, and motivated search, and features of the organizational context that directly influence preferences. Contentious with ambiguity, conflict, and divided labor. Despite its unique strengths and a considerable body of work (see below for some foundational references), research that adopts the Carnegie perspective is still relatively unknown outside the field of organization studies. As James March noted, Carnegie has been primarily an importer of ideas rather than an exporter. The goal of this research topic is to facilitate dialogue and integration between this well-established Carnegie perspective and other lines of inquiry into the study of decision making and problem solving. We are interested in bringing to the fore what is distinctive in the accumulated body of evidence produced by the Carnegie perspective and highlighting similarities, differences, and potential points of connection with other research done on similar topics. To achieve this goal, we hope that the front end of each submission will cover the following four components:
